LETTER OF TRANSMITTAL.

STATE OF MARYLAND,
DEPARTMENT OF EDUCATION,
OFFICE OF THE

STATE BOARD OF EDUCATION,
ANNAPOLIS, September 18, 1907.

TO HIS EXCELLENCY, EDWIN WARFIELD,
Governor of Maryland.

SIR:—I have the honor to transmit to you the Annual Report of the State Board of Education for the fiscal and scholastic year ending July 31, 1907, with accompanying documents, as required by law.

Very respectfully,

Your obedient servant,

M. BATES STEPHENS,
Secretary.

CONTENTS

Preface	7- 13

Worcester County.....	372-381

PREFATORY.

The Forty-first Annual Report of the State Board of Education of Maryland is herewith submitted. It is not as full and comprehensive as it should be for the reason that the law limits the appropriation for printing and distributing it to one thousand dollars. With prices of printing, materials, and cost of labor steadily advancing it becomes necessary to limit the number of pages of the report from year to year.

A growing public interest in school work makes necessary a more comprehensive report of the State Board of Education which may contain such discussions of school problems and statistical tables as will bring to the attention of the reader full information relative to our State school system and its operation. It is due the public and certainly but fair to our State school officials who must keep the people informed on the progress of school work, that the next Legislature increase the amount of the appropriation to such a sum as will make possible a complete report.

It is not an idle boast to say that the school year for which this report is made was remarkable in good results. This satisfactory condition cannot be traced to any particular cause, but rather to a steady improvement of school conditions "all along the line." There is an increasing public interest in public education. School anniversaries and other public gatherings under the auspices of our schools have had the effect to stimulate the sentiment of the community in favor of bringing educational work to a higher standard and placing school instruction on a higher plane of efficiency.

Our patrons are realizing more every year that the control and management of the schools are in their hands and that the usefulness of school work will be measured by the manner in which they discharge their obligations and meet the duties which the law imposes upon them. The conviction must become even more universal than it now is that the school trustees, when performing their duties efficiently, living up to what the law expects and requires of them, are the most vital parts of our school administration machinery,

and when derelict to such duties are the greatest hindrances to effective school work.

Both State and county school officials realize that the successful operation of the school system hinges largely on how well the school trustees perform their part of the work, and for this reason there is being exercised more care in the selection of these officials who are directly the representatives of the people in the school system.

Patrons' meetings and other opportunities for informing the parents of what is expected of them in the process of public education should be encouraged to the end that the whole people may extend a more earnest and intelligent co-operation.

American civilization is constantly assuming a higher type. Its changing conditions make new demands on our educational agencies which must be met in order to adjust our teaching to the requirements of community life and interests. There is a growing tendency to prepare our pupils, in a broad sense, for the vocations, and to this end we must keep on weeding out those relics of traditionalism that are in the curriculum and substituting in their stead subjects which pertain to the affairs of human life. Hence public school work cannot become a fixed thing. Its standard and the means and methods employed to foster it must in a sense be ever changing in order to make our system of teaching equal to the new demands which the changing conditions of a republican form of government and its wonderful institutional life make necessary.

The approaching session of the General Assembly of Maryland should be interesting to our people because of the opportunity it will bring to further improve the public school situation. It is now a maxim that the energies of a State are never better employed than when fostering and perfecting its system of public schools. May all of us become convinced of its wisdom and make an honest effort to bring to our schools that recognition and financial encouragement which will make their work second to none!

OUR BEST TEACHERS.

The law should be amended so as to protect our best, most capable teachers. The General Assembly of 1904 gave recognition to the untrained and inexperienced teacher by providing that no white teacher in the State, whose average of pupils is fifteen or more, shall receive less than three hundred dollars. This is an absolute guar-

antee to the most incapable teacher who meets the requirements, of an amount not less than three hundred dollars. The trained, most capable, and experienced teacher is guaranteed no more. We should consider our best teachers first and throw about them such protection and recognition as will keep them in the work. We should ask our lawmakers to fix a minimum salary for our best teachers and make it such an amount as will fairly compensate them.

STATE SCHOOL APPROPRIATION.

The State school tax was fixed by the General Assembly of 1906 at sixteen cents, from which fund there must be deducted one hundred and fifty thousand dollars for free text books. This is a decrease as compared with the amount received for the two preceding years. For that period the State school tax was fifteen cents and an additional tax of one and three-fourths cents for free text books. That rate of $1\frac{3}{4}$ cents did not raise more than \$126,000, and the sum of about \$24,000 was taken, not from the school fund but from the general State fund, to supplement the amount the $1\frac{3}{4}$ cents raised in order to bring the fund to the required one hundred and fifty thousand dollars. It will be seen that our school funds lose the three-fourths at one per cent. plus \$24,000. There was a general agreement at the close of the session that the school tax rate should be fixed at sixteen cents, but we found out a year ago that the general school fund was less than for the two previous years, although we had been led to believe that it would be more.

The opinion is generally shared that inasmuch as there has been a shrinkage in the State school funds the whole loss should not fall on the general fund. There is no reason why the one hundred and fifty thousand dollars for free text books should be held so sacred that it must forever remain the same and before any other demand is met this amount must be set aside at any cost. In the first place there is no exigency which makes such action necessary. It is generally recognized that the free book fund could stand a reduction better than the general fund. There should be a change in the law which would relieve the sixteen cents rate at this fixed charge of \$150,000, to be deducted before any of the school funds are distributed. There appears no reason why School Boards cannot be required to furnish necessary text books to pupils out of their portion or proportion of the funds the sixteen cents school tax raises

and thus do away with the special free book appropriation. If this were done there would become available for other school purposes several thousand dollars now tied up in the free book fund or generously spent because it cannot be used for other purposes.

COUNTY INSTITUTES.

There is a noticeable improvement in the character of work done in the County Teachers' Institute. Every year the aim becomes more definite and the drift is toward those currents of thought in the pedagogical realm which are doing so much to unify and systematize the work of the school rooms throughout the entire country. As an evidence of increasing interest in the professional phase of teaching we point to an attendance of fifty-one Maryland teachers and three county superintendents at the summer school of Columbia University the last session, and there is scarcely a summer school of note in the East that did not register representatives of our corps. Some of the counties, viz.: Baltimore, Caroline, Somerset, Wicomico and Worcester, took two weeks for their institutes this (1907-08) year, and the teachers of those counties should receive hearty commendation for the interest which prompted them to make the necessary sacrifice in order to devote two, instead of one week to this preparation. Only wide-awake superintendents and teachers will do more than the law requires. It is just such a spirit as should bring to these teachers larger remuneration for extraordinary work.

HIGH SCHOOL FUND.

The old academies incorporated in the early days of our history and before a system of public schools was inaugurated should no longer receive special appropriations. In almost every instance they have outlived the purposes for which they were created and there is now no good reason why the county school board should not receive and disburse all monies levied for primary, elementary and secondary school purposes. Appropriations amounting to about fifteen thousand dollars are made by the Legislature annually for such schools and a much larger amount goes every year to private schools for elementary and secondary education. In short, the State is making two appropriations for the same purpose. We wish to say again in connection with this introduction to the report of the Board

that no educational institution of the State should offer, in return for an appropriation, scholarships which involve instruction in subjects below those required for graduation in our accredited high schools. In all such cases the State is doubly taxed for the same thing. Colleges receiving State aid should be required to state into what class graduates at high school may enter and take up work where they left off in the high school.

The General Assembly should create a permanent high school fund with which to aid certain accredited high schools of each county where such have been established. These schools are not well equipped in all cases either with teachers or apparatus. The amount now appropriated to the old academies may be used as a nucleus for a high school fund, and this could be supplemented from other sources until it becomes adequate to provide necessary facilities to make our high schools equal to the demands which are being made upon them.

Our State Board of Education recently adopted for the last two years of the high school course two elective courses—one commercial and the other agricultural. The best interests of our pupils and the material welfare of the community require that these opportunities for learning at least the rudiments of vocational life shall be offered by our high schools. It requires more expenditure in the way of funds than the school board of the county can set apart for that purpose. To inaugurate these elective courses calls for more expert teachers and they cannot be provided unless the State extends substantial encouragement in the matter of an appropriation especially made for high schools. It is a question whether the fund should be divided among the high schools or apportioned as other State school appropriations are made. Two years ago the General Assembly reported favorably in the Senate a House bill which carried an appropriation of fifteen hundred dollars for one school in each county where there was a commercial department. This bill did not become a law, as it reached the files at the Senate only a few days before adjournment, and it was possibly fortunate it failed, as our school authorities were not ready for it. Since then much time has been spent in formulating a business and also an agricultural course, either of which may be inaugurated in any high school on the accredited list as soon as the State extends the needed financial aid.

TRAINED TEACHERS.

The weakest point in the whole fabric of school instruction in this State is the limited number of trained teachers who come to our ranks. We have two normal schools and a normal department at Washington College, and the maintenance of these involves an expenditure which seems quite large when we consider the number who graduate. In our zeal to protect the people from the baneful effects of inefficient teaching it is just possible we have made the requirements for graduation too high. In the matter of school appointments we find that the Normal graduate who spends two years in the Normal School after graduation from a high school is generally placed on the same plane with the high school graduate who has received no special training. Possibly this statement is a little broad; but at least several of the County School Boards and Boards of District School Trustees are as apt to select the latter as the former. It is possible to provide a plan which will eventually bring trained teachers to all schools, and the attention of the reader is called to the chapter of this report bearing on Normal schools.

The State is entitled to the very best results from the money spent for this purpose, and if some other place than the one now in operation will bring about greater efficiency on the part of our teaching force, for the same money, we should hasten to inaugurate it.

COLORED SCHOOLS.

The situation as regards the colored schools does not improve, as will appear from the contents of the chapter on industrial education for colored children. A plan is now on foot to prescribe a course of study which will emphasize the industrial arts. A line of work patterned after that followed at Hampton and Tuskegee will bring to such pupils manual dexterity and a knowledge of vocations which will make them, when they leave school, fit into the conditions of community life with minimum friction. Our education has been for the head too much. All children, especially the colored, need hand and heart education as well. We must plan to give more. As these children grow into manhood and womanhood their training and education should enable them to start in a vocation with some efficiency. They must be taught to do things. Our colored schools lack competent teachers. We cannot give an industrial bias to their

education and have them acquire skill in handicraft, unless the teacher possess such skill and knowledge. Our teachers have not been trained in schools where the industrial feature was prominent—at least not many of them. We need such a school in Maryland; the same to be supported by a State appropriation. Industrial education is more expensive than the type we have been giving, but the additional benefits more than make up for the extra cost. These children must be educated and trained and we must arrange their school course along such lines as will make them most efficient in their vocation when they enter upon its work. We must be fair to these pupils. In some counties the schools remain open such a short time that capable teachers cannot afford to accept positions. It has the effect of driving away good teachers, and in such a contingency the schools had as well be closed.

The Baltimore Normal School for the training of teachers for colored schools is not liberally supported. Indeed, the two thousand dollars it receives from the State is less than one-half enough to make its instruction effective. It will be better for the State, as well as for colored school interests, to discontinue this appropriation and purchase the industrial school in Howard County, near Laurel, and make it a good industrial and agricultural school where teachers for the schools of the entire State may be trained.

Respectfully submitted,

M. BATES STEPHENS,

Secretary.

SUMMARY.

A summary of school statistics for the year ending July 31, 1907, in the counties, and year ending December 31, 1906, in Baltimore City, as compared with previous year.

Number of schools in Baltimore City.....	108
Number of schools in counties.....	2,407
Total.....	2,515
Being an increase in 1907 of 10.	
Number of different pupils, city.....	88,905
Number of different pupils, counties.....	145,181
Total.....	234,086
Being an increase in 1907 of 6,472.	
Average number in daily attendance, city.....	55,079
Average number in daily attendance, counties.....	79,872
Total.....	134,951
Being a decrease in 1907 of 8,042.	
Number of teachers, city.....	1,742
Number of teachers, counties.....	3,548
Total.....	5,290
Being an increase in 1907 of 46.	
Number of months schools were open, city.....	10
Number of months schools were open, counties (average).....	9.28
Average.....	9.31
Being a decrease in 1907 of .29.	
Receipts from all sources, city.....	\$1,642,773 67
Receipts from all sources, counties.....	1,819,502 26
Total.....	\$3,462,275 93
Being an increase in 1907 of \$121,694 79.	
Amount paid, teachers' salaries, city.....	\$1,330,128 93
Amount paid, teachers' salaries, counties.....	1,171,037 28
Total.....	\$2,501,166 21
Being an increase in 1907 of \$107,069 31.	
Amount paid repairing and furnishing schoolhouses, city.....	\$47,815 77
Amount paid for building, repairing and furnishing schoolhouses, counties.....	183,822 27
Total.....	\$231,638 04
Being an increase in 1907 of \$1,373 62.	
Amount paid for rent, fuel and other incidentals, city.....	\$109,447 97
Amount paid for rent, fuel and other incidentals, counties.....	117,024 25
Total.....	\$226,472 22
Being a decrease in 1907 of \$254 09.

Total expenses for public school purposes, counties.....	1,824,556 47
Total.....	\$3,402,669 89
Being an increase in 1907 of \$167,882 83.	

Amount received from State school tax, free school fund, academic dona- tions, free book fund and manual training fund.....	\$1,485,122 94
Amount received from county and city tax.....	1,939,287 06
Total.....	\$3,424,410 00
Being an increase in 1907 of \$363,532 22.	
Amount paid for miscellaneous expenses.....	\$94,521 09
Being a decrease in 1907 of \$9,916 69.	
Total number of pupils enrolled.....	234,086
Being an increase in 1907 of 6,472.	
Highest number enrolled in one term.....	211,742
Being an increase in 1907 of 14,784.	
Average number of daily attendance.....	134,951
Being a decrease in 1907 of 8,042.	
Number in First Grade.....	56,074
Being a decrease in 1907 of 2,021.	
Number in Second Grade.....	31,669
Being a decrease in 1907 of 3,146.	
Number in Third Grade.....	31,284
Being a decrease in 1907 of 232.	
Number in Fourth Grade.....	27,602
Being a decrease in 1907 of 123.	
Number in Fifth Grade.....	20,375
Being a decrease in 1907 of 1,522.	
Number in Sixth Grade.....	14,624
Being an increase in 1907 of 356.	
Number above the Sixth Grade.....	15,558
Being a decrease in 1907 of 2,561.

REPORT OF PROCEEDINGS OF COUNTY SUPER- INTENDENTS' ASSOCIATION.

ALBERT S. COOK, *Secretary Pro Tem.*

ANNAPOLIS, MD., December 5, 1906.

The Association of County Superintendents of Maryland met at Annapolis, Md., in the old Senate Chamber, Dr. Alexander Chaplain, President, and Albert S. Cook, Secretary pro tem.

The Association was called to order by President Chaplain at 11.45 A. M., the following members being present:

Alexander Chaplain,	E. W. McMaster,	Milton Melvin,
W. C. Phillips,	Frederick Sasscer,	S. Simpson,
Jno. P. Fockler,	E. M. Noble,	M. Bates Stephens,
Earle B. Wood,	William H. Dashiell,	H. R. Wallis,
A. C. Willison,	Oscar B. Coblentz,	Albert S. Cook.
John T. Hershner,	George Biddle,	

After reading and approval of the minutes of the last meeting, "Possible Combinations for Joint Institutes" was discussed. W. H. Dashiell, of Somerset County, spoke enthusiastically of the plan of combining for Joint Institutes, basing his remarks on the experience of Wicomico, Worcester and Somerset Counties. He suggested possible combinations in other parts of the State.

Dr. Simpson, of Carroll, stated there was some negotiation last year looking to a Joint Institute of Washington and Carroll Counties, which would probably mean a Joint Institute in Hagerstown in the coming year, as both Boards seemed heartily to favor the plan.

Superintendent Sasscer, of Prince George's County, spoke in the highest terms of the Joint Institute of five counties held at the Maryland Agricultural College, and said that it was a gratifying success and that all were anxious to repeat it.

Superintendent Browning, of Garrett County, asked some questions concerning the future development of the Institute, and suggested some means for making the work count towards the professional advancement of the teachers.

Superintendent Willison, of Allegany, expressed the view that the plan of Joint Institutes will probably culminate in a State Summer School or a State University.

Superintendent Cook, of Baltimore County, spoke of the sectional plan of conducting institutes in that county.

Superintendent Noble, of Caroline, spoke of Institute work in that county and a possibility of a Joint Institute with Talbot.

Superintendent Phillips, of Howard County, approves heartily of Joint Institutes, and hopes that Howard County may join some other county next year.

The Association took a recess of one hour, after which it adjourned.

REPORT OF PROCEEDINGS OF SCHOOL COMMISSIONERS' ASSOCIATION OF MARYLAND.

DECEMBER 6TH AND 7TH, 1906.

FREDERICK SASSCER, *Secretary.*

MARYLAND STATE NORMAL SCHOOL.

BALTIMORE, MD., December 6th, 1906.

The annual meeting of the Association of School Commissioners and County Superintendents convened in the library of the State Normal School at 11.30 o'clock this day. Owing to the death of President Ephraim L. Boblitz, the meeting was called to order by Vice-President M. B. Nichols, who presided over the sessions. Frederick Sasscer, Superintendent of Prince George's County, acted as Secretary. The roll call indicated a large attendance of members.

After the presiding officer's opening address, Dr. M. Bates Stephens, State Superintendent, made his annual report.

Mr. H. H. Murphy, of the High School Teachers' Association, was asked to make an address upon the work in advanced schools, which he did. At the conclusion of his remarks he requested that two days, instead of one, be allowed High School teachers, annually, to attend the meeting of their Association. The question was discussed by Dr. Stephens, Messrs. Willison, Wright, Noble and Simpson, and then upon motion Mr. Murphy's request was granted, subject, however, to the approval of the respective County School Boards.

The first subject on the program, "What Plan of Rural School Consolidation is Practicable?" was considered.

A paper on the question was read by Mr. Edward M. Noble, of Caroline County. A discussion followed with Messrs. Stanley, Nichols, Biddle, Stephens, Wright, Simpson, Willison and Phillips participating. The sentiment was decidedly in favor of consolidation and some valuable suggestions were submitted.

The chairman then called upon Mr. Harry J. Hopkins, Chief Clerk of the Comptroller's office, who read a special paper on "Sources of Public School Revenues in Maryland," which was greatly appreciated. At the conclusion of the reading, Mr. Sasscer moved a vote

of thanks to Mr. Hopkins for his "excellent and interesting paper," and Dr. Stephens proposed an amendment to the motion, that said paper be incorporated in the next annual report to the State Board of Education. On motion Mr. Hopkins was made an honorary member of the Association of School Commissioners and County Superintendents.

At one o'clock P. M. the meeting adjourned until the following day.

FREDERICK SASSCER, *Secretary.*

MARYLAND STATE NORMAL SCHOOL.

December 7th, 1906.

The Association re-assembled this day at 10.30 o'clock A. M., and was called to order by Vice-President Nichols. After prayer by the Rev. Isaac M. Motter of Frederick County, the minutes of the previous day's session were read by the Secretary, and approved.

Superintendent Wallis of Anne Arundel County, read a paper on the subject, "Should the General Assembly Fix a Minimum Salary for First-class Elementary Teachers?" The question was also discussed by Messrs. Nichols, Hershner, Browning, Coblentz, Stephens, Wright, Beckwith, Willison, Worthington, and Cahill. On motion of Mr. Willison the matter was postponed until next year.

The presiding officer announced the following committees:

On Nominations: Geo. W. Joy, H. Spencer Matthews and Frank W. Nish.

On Resolutions: Edward M. Noble, G. Herbert Rice and Frederick O. Miller.

On Membership: Earl B. Wood.

The next paper on the program was by Mr. Oscar B. Coblentz, Superintendent of Frederick County, upon the subject; "To what Extent Should We Introduce Agriculture in Our Public Schools?" The views advanced by Mr. Coblentz were discussed by Messrs. Worthington, Mills, Shoemaker, Biddle and Cooke.

The Committee on Resolutions then made a report which was read by Mr. Wood.

Tributes in memory of deceased members were delivered by Messrs. Worthington, Wood, Coblentz, and Willison, and the memorials were adopted by a rising vote.

REPORT OF COMMITTEE.

Resolutions of School Commissioners' and Superintendents' Association submitted and adopted on Friday, December 7th, 1906.

WHEREAS, it has pleased Almighty God in his infinite wisdom to call from his earthly labors Ephraim L. Boblitz, of Frederick County, some time President of the Association of School Commissioners and Superintendents of the State of Maryland, a man actuated by the purest motives, prompted by a high sense of honor, cherished by all who knew him, and loved for his qualities, his virtues and his devotion to the profession of which he was an ornament; therefore, be it

I. *Resolved*, That, while we accept with becoming humility the solemn decree of Providence which erreth not, we wish to express our sorrow for the loss of so good and so great a man as was our departed associate, whose labors for the cause of public education were many and from which he has been summoned, in the fullness of his powers, by the silent messenger of death.

He was ever ready to take up the most arduous tasks of his responsible position with a cheerfulness that made his work a pleasure and which communicated itself to those with whom he labored. His efforts were always along lines best fitted to inspire higher ideals and nobler aims. His example was one productive of emulation and encouragement to others whose footsteps were faltering along the pathway of life.

A man of strong Christian character, having been for many years Superintendent of the Lutheran Sunday School of Frederick, he enjoyed an enviable reputation among the leading educators and business men of the State, the confidence of whom in his probity and integrity was never shaken during his long years of service to those of his and coming generations.

When he passed through those portals which never swing outward, the schools of not only his county but of the State lost a friend whose life was spent in their advancement along conservative lines.

Words are inadequate to express our appreciation of the qualities which endeared him to those with whom he came in contact, which challenged the admiration and commanded the respect of all, which won for him the boundless love of his devoted family, which delighted to honor him and which was in turn honored. Be it further

II. *Resolved*, That a copy of this expression of sorrow of the Association be conveyed to the bereaved family.

Inasmuch as the "Angel of death has spread his wings upon the blast" and called upon another of our honored and esteemed associates, Louis L. Beatty, who long and faithfully served the people of Queen Anne County, bending every energy to uplift and better the condition of the people by the noticeable improvement of the schools of his county, be it

III. *Resolved*, That the Association suffered a severe loss when this distinguished educator was called from his sphere of action to the rewards he so richly merited and which ever come to those who fight the good fight and keep the faith, and it is the desire of the Association that a copy of this testimonial of his worth be sent to the family so recently bereft.

IV. *Resolved*, That the thanks of this Association ought to be and hereby are extended to the State Board of Education and to Dr. M. Bates Stephens for their recent hospitality to this body while in Annapolis.

V. *Resolved*, That we commend Dr. M. Bates Stephens for the successes which are gradually crowning his efforts for the upbuilding of the schools and the education of the people and that we appreciate his endeavors to introduce the most modern and successful methods of conducting schools and the progressive movements he is now planning.

VI. *Resolved*, That we extend our thanks to Dr. G. W. Ward, Principal of the State Normal School, and to those in charge of the institution for the use of the building for this meeting and for their constant kindness and many courtesies, which have gone far to make our stay in the city pleasant and profitable.

VII. *Resolved*, That we give a vote of thanks to the representatives of the publishers with whom the County School Commissioners have business relations, and the W. J. C. Dulany Company for their kindness in entertaining us while in Baltimore.

VIII. *Resolved*, That we do as a body petition the Financial Authorities of the State of Maryland to comply with the public school law as to the distribution of the school funds of the State, several thousand dollars of which are annually paid out as interest by the different counties, which condition would not exist were the laws properly interpreted and executed.

IX. *Resolved*, That the Secretary and Executive Committee be authorized to take such steps as they may deem best, prior to the next meeting of the Association, looking to a better method of increasing the attendance at the meetings of this Association.

X. *Resolved*, That, it is the sense of this Association that the interest of public education will be best subserved by further encouragement and patronage of the Maryland Educational Journal, whether its name be changed or not, whether its price be doubled or not, so long as it remains a local journal, believing it is better to maintain a good journal at a fair price than a poor one at a cheap rate.

XI. *Resolved*, That we, severally and collectively, shall put forth renewed effort to increase the membership of the State Teachers' Association and the attendance at its annual meeting.

XII. *Resolved*, That the Association appropriate the sum of five dollars to pay the janitor of the Normal School for the extra service required of him by reason of the meeting of the Association in this building.

A. W. SISK, *Chairman*.
EARLE B. WOOD, *Secretary*.

After making several minor amendments, the report of the Committee on Resolutions was adopted by the meeting.

The Committee on Nominations reported as follows:

President—A. C. Willison.

First Vice-President—Chas. H. Stanley.

Second Vice-President—Geo. O. Gary.

Secretary—Wm. P. Beckwith.

Executive Committee—Harry R. Wallis, W. B. Copper and H. Crawford Bounds.

On motion of Mr. Biddle, the Association adjourned.

FREDERICK SASSCER, *Secretary*.

SECONDARY EDUCATION.

It is not practicable to attempt an extended review of this phase of education in Maryland in connection with this report. The history of education in this State covers a period of more than two hundred years and the purpose of this prelude to the chapter is to call out some facts relating to academies and public funds for their support, which may serve as a guide in tracing the high school idea with which we are so much concerned at the present time.

The first effort made to establish a school in the Colony resulted in the founding of King William's School, which was built on Capitol Hill, Annapolis, near the site of the Taney statue. The institution was evidently more than a primary school. Governor Nicholson intended it perhaps as a feeder for William and Mary College, in the colony of Virginia which he had helped to establish a few years before. King William's School was one of a chain or system, for the maintenance of which the General Assembly of 1696 provided. It is probable that this is the first act of Assembly anywhere in the Country which recognized a *system* of free schools by making provision for support. As soon as King William's School was "on its feet," then the remainder should be spent in erecting a school at Oxford, Talbot County, and endow same with 120 pounds per annum. As the funds increased, there was to be founded one school in each county until each of the twelve counties should have school facilities. But owing to insurmountable difficulties in laying duties and taxes and in collecting subscriptions, there was but one school (King William's) actually started as late as 1717. In 1723 another law was passed. It provided a duty upon pork, pitch, or tar, imported from any other colony, which fund was to be used toward the maintenance of free schools. This amount was supplemented by one-half of the fines collected for violation of the act. The General Assembly of 1723 re-enacted the law providing for one school for each of the, then existing twelve counties, such school to be centrally located. Each school had a Board of Visitors consisting of seven persons who constituted a body politic with rights to hold property, fill vacancies, etc. The schoolmaster was to have the right of his plantation and the sum of twenty pounds—less than one hundred dollars—for his services each year. In 1732 an effort was made in the Legislature to found a college in Annapolis, but it failed as did other efforts to found colleges until 1782 when Washington College was founded at

ANNAPOLIS HIGH SCHOOL BUILDING.

(Photo by McAboy.)

Chestertown; while three years later St. John's College was founded at Annapolis. There was but little accomplished along the lines of free schools from 1732 to the beginning of the Revolutionary War.

As the purpose of these introductory remarks is to speak of the incorporated academies out of which our system of secondary education has grown, the remaining comments will be confined to their consideration.

In 1785 the State thoroughly committed itself to the policy of giving financial encouragement to academies and colleges. The money for these appropriations was first taken from marriage license fees, this plan being substituted for the first bill to provide school revenues by imposing a tax on bachelors. Washington and St. John's Colleges were the only institutions to receive state aid until 1798. The appropriations to the Colleges in 1784, like the Act of 1696, was regarded as an effort to concentrate the educational resources of the State; the Act of 1798 was intended to spread the donation over a larger field and give the counties the benefits of the funds. In 1770 the two schools of Somerset and Worcester were united into the Eden school which proved a failure. Washington Academy located at Princess Anne, which was incorporated in 1779, became the successor of the Eden school by sharing its donation. It is well to say here that the first of the incorporated academies, which later became so numerous, was Lower Marlboro, which was the successor of the Calvert County free school. Lower Marlboro Academy was incorporated in 1778. In 1774, the schools of St. Mary's, Charles and Prince George's Counties united into one school which was named Charlotte Hall. The following schools were also incorporated: Hillsborough, Caroline County, 1798; Georgetown, Kent County, 1798; Easton, Talbot County, 1798; Centreville, Queen Anne County, 1803; Rockville, Montgomery County, 1809; Hagerstown, Washington County, 1810; Baltimore College, 1803; West Nottingham Academy, Cecil County, 1811; Bel Air, Harford County, 1811; Cambridge, Dorchester County, 1812; Union Academy, Worcester County, 1812; Buckingham, Worcester County, 1813; Brookville, Montgomery County, 1814; Bladensburg, Prince George's County, 1815; The Impartial, 1816; Liberty, 1817; Big Pipe Creek in 1818—all in Frederick County; Shrewsbury, Kent County, 1816; Church Hill, Queen Anne County, 1817; Elkton, Cecil County, 1817; East New Market, Dorchester County, 1818; Salisbury—then Somerset County—1818; Garrison Forest, Baltimore County, 1817; Franklin, Baltimore County, 1820 and St. James, same county, 1821;

Denton, Caroline County. 1827; Upper Marlboro, Prince George County. 1835; Leonardtown, St. Mary's County. 1835; Friendship. 1839; West River, 1841, and Anne Arundel, 1856—all of Anne Arundel County. As an interest in free schools spread from one community to another there was a tendency to multiply the schools in the various counties and in this way the number of schools receiving State aid became more numerous and consequently the amount each received proportionately less.

In Cecil County: Perryville, 1839; Washington, 1840; Port Deposit, 1842, were added and also these schools in other counties: Kent—Millington, 1827; Queen Anne—Union, 1838; Talbot—St. Michaels, 1838; Dorchester—Vienna, 1832; Cambridge, Female, 1858; Somerset—Wetipquin, 1834, Potato Neck, 1839; Calvert—Prince Fredericktown, 1832, Battle Creek, 1835, Hall's Creek, 1841, Plum Point, 1845; Baltimore—Pikesville, 1847, Govanstown, 1832, Livingston, 1833, Hereford, 1837, Union, 1837, Powell's Run 1841, Sherwood, 1843, Columbian, 1844, Green Lane, 1845; Harford—Abingdon 1829, Little Creek, 1834, Cokerbury, 1834, Havre de Grace, 1835, Darlington, 1835; Carroll—Manchester, 1828, Oakland, 1832, Deer Park, 1834, Carroll, 1837, Westminster, 1838, Union Town, 1838, Wolf Bottom, 1839, Clover Hill, 1839, Freedom, 1842, Taneytown, 1843, Green Mount, 1849; Howard—Patapsco Female, 1833, Warfield, 1845, Welling, 1845; Montgomery—Hopewell, 1842; Frederick—Middletown, 1809, Visitation, 1846, Union, 1846; Washington—Washington, 1830, Clear Spring, 1835; Allegany—Allegany, 1798, Frostburg, 1839, Westernport, 1860.

In 1865 there was established a general school system, and inasmuch as the State donation for academies had become so subdivided as to make the maintenance of the schools an embarrassing problem, it was decided by the constitutional convention of 1865 to make the several State appropriations into a county high school fund and operate such schools through the county school officials. The proposition was antagonized by the friends of the favored academies and two years later it was decided to maintain the integrity of the academy by making the appropriation direct. It is now apparent it would have been much better for the cause of secondary education had the Act of 1865 remained a law. While a great many of the academies, for various reasons, have been absorbed by the agents of public education, there are several, as will appear from an exhibit in this report, which still are separated from the salutary influence of a County School Board, as regards control.

The time has come in a pre-eminent sense when the State must dedicate a fund for the purposes of secondary education just as it does for Manual Training, Normal and Collegiate education. A liberal appropriation for high schools by the State is a necessary step toward recognizing the importance of such schools and such recognition seems needful to arouse and stimulate local interest in this phase of school work. Every year the relation of the school to vocational life is better recognized until now arrangement has been made for giving more option or election in courses of study. The State school officials have adopted a Commercial or Business Course and also an Agricultural Course in addition to the regular academic grade work. The more electives there are in a curriculum, the greater the number of teachers required to do the work. It is a most difficult task to persuade the County Commissioners to make liberal provision for the high schools. Since the time has come when the endowed academy has outlived its usefulness and the opinion universally shared that all schools—primary, elementary and secondary—should be under the control of the public school authorities, there should be passed by our next General Assembly a law repealing all appropriations made for schools whose instruction is not beyond that given in our accredited high schools, and the creation of a high school fund which should be distributed in some equitable manner among the various County School Boards. No school should share this fund unless it has been regularly inspected by the State school officials and certified as an accredited high school.

There are in the State, including Baltimore City, about thirty-five accredited high schools. There should be set apart for their proper maintenance and enlargement a fund of not less than sixty thousand dollars which should be divided among the several counties where there are accredited high schools on the same basis that the State school tax is now apportioned. There should be fixed a maximum number of such schools for a county and the State Board of Education, after conferring with the county school officials, should designate the schools to receive aid from the high school fund. At least ten thousand dollars of the high school fund can be obtained from the amounts now appropriated to private academies. There is no desire to suggest that the appropriations now made to the colleges should be decreased; but there is objection that any part of such appropriations shall be used in establishing scholarships for instruction which can be given in our high schools. In other words, it is

little less than waste for the State to make two appropriations for the same purpose; and this it does do when it supports a system of high schools and then makes liberal appropriations to colleges and other institutions where much of the instruction which is given is no more advanced than that our high schools accomplish. If the amounts appropriated to such schools are to remain what they now are, let it be made a condition of the appropriation that no part of it shall be used for instructions in studies which our high schools give.

Since this additional State aid is asked in order to meet the extraordinary expenses incident to the introduction of one or more elective courses, it should be required of each school receiving such aid to offer to students the election of at least one of such electives.

An article published recently in the *Saturday Evening Post* and written by that eminent Superintendent of the schools of Chicago, Hon. Edwin G. Cooley, seems so excellent in its suggestions, especially as they relate to the work of the high schools, that we give the article in full:

COMMON SENSE IN COMMON SCHOOLS.

By EDWIN G. COOLEY,

Superintendent Chicago Public Schools.

What is the trouble with our public schools? Thoughtful parents all over the land are asking this question with increasing persistency. They are entitled to a fair and frank answer, for they do not raise the issue in the spirit of the hypercritical public busybody pursuing the vocation of professional reform and flitting from one crusade to another, as the limelight of popular sentiment may chance to shift. They are anxious and sincere inquirers whose deepest concern is the welfare of their children, and it may as well be confessed, at the start, that there is cause for their anxiety.

For one thing, the trouble with our common schools is that they are not *common* enough. Of late the educational atmosphere has been clamorous with the cry: "Democratize the common schools!" While I may differ in my definition of the phrase from those who use it most, I am heartily in accord with the doctrine itself, as I understand it. To me this phrase means making the common schools more common; bringing them closer to the common people, adapting them more practically to the needs of the great body of pupils; bringing

EASTERN FEMALE HIGH SCHOOL BUILDING, BALTIMORE CITY.

them into truer range with the life-work of the average boy and girl educated in them.

Some educators may see in this statement a lowering of ideals. The gunner who sends his shots high above the head of the enemy may have exalted ideals of patriotism, but he would do his country greater service if he would lower his aim to a point where his shots take effect.

There is no denying that our public schools are doing too much overhead shooting. This may have a sensational, almost heretical, ring, but I believe that the soundest educators in the country will confess to its truthfulness.

The great Huxley declared that "The educational ladder should have one end in the gutter and the other in the university"—and so it should. But that does not qualify the statement that our high schools, for example, have been closer to the colleges than to the people—nor does it render the fact less unfortunate. Probably this tendency to overshooting in our public-school educational system shows more plainly in our high schools than elsewhere. What is a common-school education for, unless it be to fit the mass of pupils for the practical duties of life? And if the high school leaves its pupils with only a preparation for college instead of a preparation for life, when most of its pupils cannot go on into college, does it not score a lamentable failure in efficiency and overshoot the educational mark?

I am profoundly convinced that great harm comes to public-school education in this country through the almost universal tendency to make a fetish of graduation. Instead of making the high school the People's College, the tendency of those who frame the curriculum is to make it merely a feeder to the university. And this false viewpoint is inevitably reflected by the great body of pupils. Any high-school principal will verify the statement that it is common to hear pupils say: "I can't graduate, so it isn't worth while to finish the course." Hundreds of thousands of pupils in this country cut short their schooling and drop out of the ranks, every year, for this reason and no other. In a word, they act from the standpoint that they are in the high school to graduate rather than to learn, and they voluntarily sacrifice the year or two years of instruction which should do most to equip them for the hard and practical struggle of life. Would they hold this false and foolish notion which tricks them into cheating themselves, if the architects of the public educational system had not been inoculated with the same idea?

The effect of treating the high school as a college feeder rather than a People's College is felt all along down the line of the elementary grades. The course of study in the lower grades is made subservient to the idea of high-school graduation in the same way that the high-school course is framed to fit the ideal of the college or university. The grades of pupils are put through studies which no reasonable human being would assign them on any supposition other than that of graduating from high school and passing on to the college. And yet it is a certainty that only a small percentage of grade pupils enter the high school, to say nothing of being graduated from it, while the percentage of those who reach college is almost infinitesimal.

But concrete example is far more effective than abstract statement. Let me give an instance of our present high-school training, which is so typical that its truthfulness will be recognized and admitted by any principal of a large city school. Recently I became interested in a bright boy who was graduated from one of our high schools and whose circumstances made a college training impossible. On inquiry I found he was leaving the high school to go into a factory. What sort of preparation, I asked, had his schooling given him for the life upon which he was entering? His mother had helped him to get his education by "taking in washing." Such a sacrifice was worthy of rich and practical results. And those results were?—four years of Latin, two years of Greek, two years of German, one year of French, two years of mathematics, a minimum of English and history, and no civics or political economy! And the trouble was not with the boy—he had been placed at the educational feast and had eaten what was set before him, "asking no questions for conscience' sake." The curriculum, the whole educational scheme of the grade and high school, was responsible for his educational misfit. He had a good start for college and a professional career, but his equipment for making his way in a factory was about as deficient as the imagination could well suggest. And those who go the way of the factory, the store, the shop and the streets are thousands to the tens who persevere to the university classroom.

From the fact that a great body of pupils drop out of the grades of the city school when the demands of the compulsory education laws have been satisfied, the importance of another defect in our schools may be realized. I refer to the tendency to put the best teachers in the higher grades of the high school. This results in placing the instruction of the younger pupils—the greatest in num-

bers—in the hands of the teachers who are least “interesting,” who are least capable of investing study with a charm and attraction that will arouse the interest and ambition of the pupils and lure them to continuing in school beyond the point of compulsion. If this defect in our common-school system were generally remedied, I cannot doubt that the ranks of those who “drop out” would be substantially diminished.

Only a slight review of the army of the boys who “drop out” of the schools of a large city is necessary to reveal two startling facts: first, that they assign as a reason for their indifference the fact that “there’s no use going any more, because they can’t graduate anyway”; second, that large numbers of them, as soon as this conclusion is reached, use the school as a blind to escape work and spend their time “bumming”—a technical term used to cover truancy and a “good time” ranging the streets and, generally, “shooting craps” in alleys and acquiring a comprehensive education in vice and degeneracy. This they can do with much greater facility when they are above the age covered by the compulsory education statutes. While it is impossible to give statistics on this matter, it is true that a very large proportion of pupils start upon this course of systematic truancy at the point where they become convinced that they are not elected to graduation.

I cannot escape the conviction that there is too much of a tendency, so far as our common schools are concerned, to educate the mass of our boys out of touch with their social and vocational needs—too much of a tendency to make prigs of them and to give them a dislike for any calling which will not allow them to wear nice clothes and keep their hands unsoiled. All honor to the boy who feels that he is called by his own natural gifts to do what his condition in life fits him for.

The educational system which stimulates the boy to rise above his environment and go higher in the vocational and social scale is a good system so long as it actually accomplishes this result in a fair percentage of cases; but it is not desirable when it achieves this at the cost of making a high percentage of educational misfits in order to elevate a few into the intellectual or professional pursuits.

Common-school training should be a common-sense training adjusted to bear directly upon the reasonable expectations of the mass of pupils, upon the needs of the community and the needs of the individual in his relation to his community. Probably many sons of mothers who have done washing and other manual labor as

a means of livelihood have become professional men—lawyers, doctors, ministers, teachers and college professors; but I submit that, in the instance which I have just cited, a more sensible education for the boy in question would have been a solid grounding in the elemental and vocational studies—mathematics, English, manual training, physics and business subjects, instead of Latin, Greek, French and German. And those whose condition and prospects in life correspond to those of this boy are legion and form the great majority of the pupils of the public schools in the larger cities.

After all, utility should be the supreme test in education. And this standard should be especially applied in shaping the course of study in the common schools. The statement that the curriculums of the public schools will not generally stand this test may be a surprise to many parents; but such is the lamentable fact. Until very recently it has taken a courageous educator to come out into the open and squarely defend the utilitarian theory of education and fight for vocational studies for their own sake. On the other hand, there has been no lack of champions for the leisure-class theory of education. It has been fashionable to contend for those lines of study whose advantages must be mainly collateral rather than direct, for general mental discipline and a broad liberation and harmonious development of the faculties, as contrasted with a training calculated to fit the pupil for the successful pursuit of a vocation—although, perhaps, a humble one. Those who have had the hardihood to contend for the so-called “fads”—such as drawing, chemistry, manual training and household arts—seem to have often felt it necessary to make their defense along the line of the leisure-class theory of training by arguing that these studies should be pursued because they liberate the faculties, put an edge on the powers of observation and elevate the mind into the altitude of clear and logical thinking. For one, I have no hesitation in urging that the men who make the curriculums of our public schools put the emphasis on the elemental and the vocational studies because a majority of the pupils cannot hope to enter professional life, and should, therefore, be trained by the shortest and most direct cut to fit themselves for the life of labor in shops, stores and offices.

One of the most important developments of modern education is the recognition that all pupils are not alike; that some are of the practical, executive type, while others are of a receptive and scholarly bent of mind. Under the old theory of education the receptive boy made a good showing in his school career, while the boy of the

practical and executive turn had a poor standing as a pupil. But keen observers of educational currents could not escape the fact that a high percentage of the boys who scored little short of a failure in school quickly outdistanced the "studious" and "scholarly" boys in the serious and responsible struggle of practical affairs.

Certainly the facts have taught us that the restless, driving, executive kind of boy is of as sound and valuable timber as the docile, studious and receptive boy; that he is as likely to cut just as wide a swath in the world's affairs as the lad who "stands higher" in class rank, and that he is as well worth educating as the "natural scholar." And we are coming, too, to recognize that he is as much entitled to a training which fits his special temperament and endowments as is the scholarly boy.

In spite of the pessimists recent years have seen a remarkable expansion of our democratic institutions; our industrial and commercial institutions have not only expanded and multiplied marvelously, but they have grown more varied and complex. This means that the call for new workers of the practical and executive type has increased and is increasing in a ratio that we can scarcely comprehend. Boys of practical and "motor" tendencies hear the call for action early and with increasing urgency.

What is the result? If they are not held in school by a line of instruction which appeals to their instincts they will quit the school-room long before they should and miss those studies which would naturally give them their best and richest equipment for the activities of industry, commerce and politics—studies which come in the high-school course when the high school is even approximately the People's College, instead of a feeder to the university, where the fetish of graduation is the central shrine to which all eyes are directed.

If I were to indulge in a word of prophecy I would say that the high school of the future will be closer to the people than to the college; that its curriculum will do more for the children of the plain people; that it will make a broader and stronger appeal to, and a better provision for, the boy who has small interest in college, but feels he must "quit and go to work"; that its course will smack less of those studies which tradition holds to be divinely appointed agencies for "mental discipline"; that it will have less of the cast-iron program and will less and less attempt to mould all pupils to the same pattern; that it will give culture to those who seek culture and help all to strike straight for the goal dictated

by their own natural impulses, whether that be a business or a profession.

More than that, it will increasingly put up to the pupil himself the selection of his course and the responsibility of its faithful pursuit. And there is nothing better for the development of character than driving at a fixed purpose with a clear sense of responsibility.

Our public schools will not be common in the truest sense of the word until these conditions are measurably realized, and until the ability of the pupil to build a gas-engine, construct a dynamo or make a difficult chemical analysis is as highly recognized as the ability to translate Virgil or Homer or demonstrate a tough proposition in geometry.

TOWSON HIGH SCHOOL BUILDING, BALTIMORE COUNTY.

REPORT OF STATE SUPERINTENDENT.

ON HIGH SCHOOLS.

August 28, 1907.

To the Honorable Members of the State Board of Education.

GENTLEMEN—As required by Chapter 584 of the laws passed by the General Assembly of 1904, I submit herewith a list of High Schools which were inspected by our department during the past school year.

These schools seem to meet the requirements of the law pertaining to High Schools, they have done the work satisfactorily and I recommend that, by your action, they be placed on the list of accredited High Schools, of Maryland. It is the privilege of any school, doing the required work of the curriculum and with at least one assistant whose teaching is limited to High School work, to apply for an inspection at any time.

Respectfully submitted,

M. BATES STEPHENS,

State Superintendent.

CLASSES OF 1907, OF FOUR TALBOT COUNTY HIGH SCHOOLS, IN FRONT OF GOVERNMENT HOUSE AT ANNAPOLIS, AFTER A RECEPTION BY GOVERNOR AND MRS. WARFIELD.

CURRICULUM ADOPTED FOR HIGH SCHOOLS, JULY 2nd, 1901.

	LANGUAGE LITERATURE.	MATHEMATICS.	SCIENCE.	CONDUCT.	ART.
SEVENTH YEAR GRADE.	Reading-Literature, Etymology, Orthography and Composition. Grammar and Composition. Writing (Business forms, Continne literary wholes in this and following grades. Latin: First Latin book second half-year.	Arithmetic. Form and geometrical exercises. Algebra begun second half-year.	Elementary science as outlined in seventh grade of elementary course. Physiology. Information reading.	Manners and Morals. History: United States and History of Maryland reviewed. National and State Constitutions. History of England begun in second half-year. Civil Government.	Vocal music. Plant forms in appropriate medium. Complete the drawing book for this grade. Original designing. still life, ornament. Clay modeling. Sloyd. Bench work. (Working drawings.) Physical culture.
JUNIOR FIRST	Reading-Literature. American and British classics. Advanced grammar and composition. Latin. First Latin book completed by end of school year. Writing (Business forms. Word analysis.	Arithmetic. Form and geometrical exercises. Algebra, through quadratic equations. Plane geometry.	Physical Geography. Information reading.	Manners and Morals. History of England.	Vocal music. Drawing: Ornament; original designing in decorative art; still life and mechanical. Clay modeling. Sloyd. Bench work. Physical culture.
JUNIOR SECOND.	Reading-Literature. American and British classics. Rhetoric: Construction of sentences; analysis of subjects; preparation of outlines; figures, style and verification. Latin: Three books of Cæsar. "De Bello Gallico." German: First German book. To the Teacher: If for local reasons the study of French is preferable, the County School Board can substitute it for German.	Book-keeping and business arithmetic. Miscellaneous problems in arithmetic. Mensuration. Plane and solid geometry. Algebra.	Physics. Information reading.	Manners and Morals. History of Greece and Rome.	Drawing: Ornament; designing in decorative art; mechanical drawing; pen and ink in still life. Clay modeling. Bench work. Wood curving } Groove carving. Chip carving. Flat carving. Vocal music. Physical culture.
SENIOR FIRST	Reading-Literature. Use books required for college entrance examinations. Rhetoric and Composition. Latin: Four books Virgil's Æneid, Latin prose composition. Grammar. Reader and Grammar. To the Teacher: Note suggestion in ninth (or Senior First) Grade relative to French.	Arithmetic and Algebra reviewed. Trigonometry and Surveying.	*Astronomy. Information reading.	Morals and Manners. Medieval and modern history.	Drawing: Ornament; mechanical drawing; pen and ink in still life; design in color. Clay modeling; Wood carving; designing. Low relief carving } High relief carving. Vocal music. Physical culture.
TENTH YEAR GRADE.					
SENIOR SECOND.					

REPORT OF PROCEEDINGS OF HIGH SCHOOL TEACHERS' ASSOCIATION.

MARGARET M. ROBINSON, *Secretary*.

BALTIMORE, Md., December 7, 1906.

The sixth meeting of the High School Teachers' Association convened in Baltimore.

About one hundred members went to Washington to visit the High Schools there. They were under the guidance of Assistant Superintendent Hughes and a Committee of Washington teachers, of whom Dr. Phelps was Chairman.

In the afternoon, by arrangement of our State Superintendent, they were received by the President of the United States, and afterwards visited the Capitol and Congressional Library.

In the evening the Association held a meeting at the State Normal School, Baltimore, at which Dr. George E. Myers, Principal of McKinley Manual Training School, Washington, delivered an address on the subject, "The Adjustment of High School Work to the Needs of the Local Community"; and at which the Normal School Glee Club sang several choruses.

A social meeting followed at which light refreshments were served.

BALTIMORE, Md., December 8, 1906.

The Association was called to order at the State Normal School at 9.15 A. M. by President H. H. Murphy.

Minutes of the last meeting were approved.

On motion the business part of the program came first.

The motion of Mr. Edward Reisler, Baltimore Polytechnic Institute, seconded by Mr. Amon Burgee, Frederick, to have officers elected at December meeting, present officers to serve till next December, was carried unanimously.

The motion by Mr. W. H. Caldwell, Chesapeake City, that the Executive Committee consist of the officers of the Association and two others, appointed by the Chair, after expiration of the term of the present Executive Committee, was adopted.

After a discussion about making the membership fee fifty cents annually, instead of twenty-five, upon the statement of the State Superintendent, that the State Board of Education had appropriated twenty-five dollars toward defraying the expense of the Association, it was decided to keep the fee twenty-five cents as at present.

The following resolutions were offered by Mr. J. I. Coulbourne, Havre de Grace, and adopted by the Association:

Resolved, That a vote of thanks be given the Normal School Glee Club and its Director, T. L. Gibson; to the speaker of the evening, Dr. George E. Myers, of Washington; to Dr. Stephens for arranging for the reception of the High School Teachers' Association of Maryland by the President of the United States; to Superintendent Chancellor and Assistant Superintendent Hughes and the teachers of Washington for the courtesy and assistance given in the visit to the High Schools of Washington.

"That the Secretary be directed to convey the same."

The Association then proceeded to a discussion of the topics on the program as follows:

The first topic: "Are the High Schools, Rural and Town, As at Present Organized, Meeting the Needs of the Community? If Not, How Can They Be Made To Do So?" was discussed by Messrs. Amon Burgee, Frederick; William Stedman, Bel Air; and H. O. Sampson, Agricultural High School, Calvert, Cecil County.

The discussion of the second topic, "Should We Have Electives In Our High Schools? If So, Should They Be By Courses or Subjects?" was led by Messrs. S. S. Handy, Easton; Arthur Smith, Lonaconing (in place of Mr. Howard Hill, of Cumberland, who was absent); and Mr. Soper, Principal Baltimore City College.

Dr. Ward spoke of the relation of the High Schools to the Normal School and of the Normal School to the teacher of the State.

Miss Dallam, of the Western High School, Baltimore, spoke of the needs of a State University.

On motion of Mr. S. S. Handy, Easton, the following committee on elective courses was appointed: Robert H. Wright, Sydney S. Handy, George F. Morelock.

The following motion by Mr. J. M. Gambrill was adopted:

Resolved, That it is the opinion of this Association that the money now appropriated by the State to aid secondary instruction in private institutions, should form a State High School fund for accredited High Schools, and that the Executive Committee be

directed to co-operate with the State Superintendent in an effort to obtain this legislation."

The meeting adjourned to the gymnasium where luncheon was served. President Murphy acted as toastmaster and Superintendent Stephens, Dr. Ward, Superintendent Van Sickle, Mr. J. M. Gambrell, Dr. Reimsen and Governor Warfield responded to toasts.

CLASS OF 1907, WITCOMB COUNTY COUNTY HIGH SCHOOL, SALISBURY, MD., IN FRONT OF GOVERNMENT HOUSE, AT ANNAPOLIS, AFTER A RECEPTION BY GOVERNOR AND MRS. WAREFIELD.

STATE NORMAL SCHOOLS.

The General Assembly of 1868 made provision for the Maryland State Normal School located in Baltimore. It has always been supported by a special appropriation, which was charged to the school fund raised by the State school tax. Professor M. A. Newell, one of the ablest educators of the country, was principal of the school from its organization until 1890. The school has always sustained a close relation to general public school interests—not alone because it was the only Normal School in the State, prior to 1896, but also for the reason that until 1900 the Principal of the Maryland State Normal School was, *ex officio*, State Superintendent.

In 1896, a Normal Department was organized at Washington College, Chestertown, and an annual appropriation of Twenty-five Hundred (\$2,500) Dollars was made for its support. The control of the Normal Department was placed in the hands of the Board of Governors of the College.

The General Assembly of 1898 had included in the appropriation bill of 1899 an item of Twenty Thousand (\$20,000) Dollars for the erection of a building at Frostburg to be known as State Normal School No. 2. It further provided Five Thousand (\$5,000) Dollars, annually, for support. The General Assembly of 1904 increased the appropriation for Frostburg Normal to Seven Thousand Five Hundred (\$7,500) Dollars and that for the Normal Department of Washington College to Four Thousand and Five Hundred (\$4,500) Dollars, annually. The appropriation of Twenty Thousand (\$20,000) Dollars for the Maryland State Normal School remained the same, but a special appropriation of One Thousand (\$1,000) Dollars, annually, for repairs was added. It will thus be seen that the State is spending, annually, Thirty-three Thousand (\$33,000) Dollars to encourage the education and training of persons for the duties of teaching. It is somewhat disappointing, when we remember that in face of the much larger expenditure for this purpose, there does not seem to be a corresponding increase in the number of Normal School graduates. In fact, the total number of graduates from the three institutions, viz: Maryland State Normal, Frostburg, and the Normal Department of Washington College, as will be seen from the accompanying reports, is smaller than the

number graduated in a single class from the Maryland State Normal a few years ago. What are the reasons for this poor showing?

There is no disposition to speak disparagingly of the progress we have made, but it is a fact which is undeniable, that trained teachers are not yet properly appreciated. The Normal graduate, save in a few counties, is on about the same footing with the High School graduate, or possibly the product of a grammar school. There is a sentiment among school trustees that the candidate for the position of teacher must have *experience*, and this idea has been carried to a foolish extreme. Experience, after all, is the best teacher; but there are many experienced teachers who are failures, notwithstanding their contact with school conditions. It often happens that experience counts for so much that no effort is made to learn with what success the applicant taught. It happens frequently that a graduate of some high or grammar school, with a record of one year's teaching experience, stands a better chance for appointment than a Normal School graduate who has never taught. The person who has dedicated four years of her life (two years, if a graduate of an accredited High School) to a preparation for teaching, and who has spent quite a sum of money in order to put on the necessary equipment to meet its demands, should be preferred in the matter of appointments, provided she has been well educated and properly trained for the work. Unless county school officials and local school trustees are willing to give this recognition and protection, the number of Normal School graduates will steadily decline until we reach a point where it will be impracticable to maintain the Normal School. Forty years of experience with Normal School training should guarantee better conditions and a stronger popular recognition of the qualifications of the trained teacher. Evidently there is something wrong somewhere, and the sooner we discover the fault and apply the remedy the better it will be for all concerned. We must have more graduates considering the large appropriation for Normal training, or we should change our policy toward these schools.

The reason just advanced, viz: a discrimination by officials and trustees against Normal graduates,—has had its effect on this phase of our work, and the very low salaries paid even our trained teachers is proving ruinous to the idea of training for teaching. In the ministry, where men are called to the work, there is an implied promise that "food and raiment" are forthcoming. In all other

callings and vocations, the remuneration must be somewhat in keeping with the character of the work and the preparation required to meet its duties. The salary of the average teacher in the counties of the State hangs dangerously close to the \$300—minimum. Taking into account the purchasing power of this amount, it is safe to say that the teacher's remuneration is less today than ever before since 1865, when the first school system was inaugurated. Hence, is it reasonable to assume that, with no certainty of preferment in filling teaching positions, with salaries the lowest in the history of our school system, and the requirements of the Normal School curriculum greater than heretofore, young men and young ladies will dedicate the necessary time and money to obtain a Normal School certificate, when they can prepare for other vocations where remuneration is more attractive, and with less work and responsibility? The characteristics of human nature are against such an assumption.

It follows then, that we must either increase the salaries of Normal graduates to an amount much larger than is now paid, or we must make it easier for them to obtain certificates. The standard of teaching should not be lowered, because the sacred interests of education should not be committed to inefficient hands. But what is the outlook for larger appropriations? Those who are most hopeful do not feel sanguine that the State school tax rate will be raised and all agree that it is a most difficult task to persuade County Commissioners to raise the local school tax rate. Our efforts should be directed to the latter proposition. After all, there has been but little organized effort to arouse a local interest in larger school appropriations. If this cannot be done, the probability grows in favor of lowering the standard in qualifications for teaching.

If young men and women come to the conclusion that they cannot afford to graduate at the High School and then spend two more years at the Normal in order to teach for three or four hundred dollars salary, it naturally follows our Normal Schools will lose their patronage and, finally, will close their doors. Suppose this condition were to arise—then what would we do to fit persons for teaching? One plan which suggests itself is to establish training schools in the counties—one school for each county where there is an accredited High School. If there be in the county an accredited High School, the State Board of Education could prescribe a two years' course in Pedagogy to be elective for third and fourth years

of the High School course, just as it has been made possible to elect a commercial course. In this way, very many would remain and complete the course because, upon its completion, they are ready to enter upon a special work with no further requirement of time or money. Certainly this plan would attract to the sphere of teaching many more than we are now getting.

How well trained would they be when they finish the teachers' course in the High School? Let's see! They have in the matter of scholarship the essential subjects which are taught in secondary schools. Some of the subjects which go with the High School curriculum must be omitted in order to give opportunity to study the subjects which are associated with teaching. In the matter of practice work, there is full opportunity. Indeed this is an immense advantage which our Normal Schools (except Frostburg) do not possess. An arrangement with the County Superintendent can be made, possibly, which will permit the seniors of the teachers' training course to do substitute teaching in various schools where substitutes may be required. The primary and intermediate classes of the school can be utilized for practice work and this guarantees opportunity for practice.

Who will have charge of the pedagogical work? If thirty-three thousand dollars were divided among the various counties with which to establish teachers' training courses, it will be seen that there will be an average of more than fourteen hundred dollars for each county. For one thousand dollars, possibly, a good Normal School instructor could be employed, who would have charge of the pedagogical work and from the nature of the case become for the whole county an expert supervisor of methods of teaching. The influence of such an instructor on the general school work of the county would be salutary.

The graduates of these training schools would receive certificates authorizing them to teach in elementary schools. It is generally recognized by the National Educational Association that the scholarly attainments of high school graduates will meet in a satisfactory way the demands of teaching in primary and elementary school grades. Hence, in such an arrangement the matter of knowledge is regarded and it would seem that the plan would bring to the schools a larger number of trained teachers—certainly a much larger number who have enjoyed the excellent advantages of practice teaching.

It may be possible that many of our Normal School graduates have failed to meet a fair expectation on the part of the public, because the opportunity to demonstrate their qualifications or the lack of them was not present at the Normal School which they attended. We cannot establish confidence in this class of teachers until we stop sending out even a small percentage who fail. In the county training school, it would be easier to detect inefficiency on the part of those who aspire to teach, and certainly it would be less embarrassing to weed out of the class those who show no aptitude than in the Normal, where students had been sent at considerable sacrifice.

Notwithstanding the excellent curriculum which has been prescribed for our State Normal Schools, it is a fact that very few graduates are elected principals of grammar schools. Such teachers and also principals of High Schools are largely college graduates, and because of this condition, the Normal Schools practically fit none except teachers of elementary schools.

If the State were even to change its policy in the matter of preparing teachers for schoolroom duties and depend on some scheme like the one herewith suggested, it would be important to have the appointments of all expert pedagogical teachers confirmed by the State Board; questions for final examinations prepared by the State school authorities and certificates issued by the State Board of Education.

If the State adheres to its present plan of training teachers, the General Assembly should consider the advisability of furnishing for each Normal institution a practice school, provide dormitories for the students where the right kind of supervision may be exercised and stipulate that a scholarship covers not alone tuition but *board*, for which the State must pay. It would seem that the State must offer this extra inducement of board, if our best young men and women are to be attracted to our Normal Schools in sufficient numbers to supply the demands for trained teachers.

ANOTHER PLAN.

There could be maintained in each accredited High School located at the county seat a county training school, where an elective pedagogical course of two years (tenth and eleventh year grades) shall be offered. All who may wish to teach shall be required to take the pedagogical course. The teacher of pedagogics should be

an expert, and to throw a safeguard about this position, the appointment to be made by the County School Board should be confirmed by the State Board of Education. The County Superintendent may be required to approve the scheme of final examinations for the graduates of the teachers' training class and the diploma, which shall be a license to teach for a definite period, may be extended by the County Superintendent and afterwards renewed, as he now renews and extends other certificates. These certificates will authorize the holder thereof to teach in the primary and elementary schools only.

If we should arrange for the county training schools, the Maryland State Normal School would be sufficient for other requirements of Normal School education and there would be need at it only for a two years' Normal course. The first and second academic years as now arranged could be abolished. Such graduates of the county training schools, as may be approved by the County Superintendent and the training teacher, shall be allowed to enter the Normal course and take either a one or a two years' course, according as they may wish either a State certificate to teach in the primary and elementary grades, or, if the two years' course is taken, to receive a certificate which will certify to their qualifications to fill grammar school principalships and positions in High School grades. Students who complete one year of the Normal course and who wish later to finish the course should receive from the principal of the school a certificate which, upon the approval of the County Superintendent, shall become a license to teach in any of the primary or elementary schools of said county.

Under these conditions the expenses of the Maryland State Normal School can be very much reduced because the number of classes has been reduced one-half. The Model School should be retained, although its need would not then be as great as it is under the present system. One of the main reasons for a new Normal School to be built outside of the city limits is to insure a good practice school. This need has been felt very keenly ever since the present Normal School was inaugurated. Should the county training schools become the feeders of the Normal School, the students will have enjoyed two years of practice teaching where conditions have been ideal for practice work; hence the requirements on the Model School will be fewer and can be met by the present arrangement. This plan relieves the necessity of building a new Normal School at a probable cost of a quarter of a million of dollars. The

plan makes possible *trained* teachers for all the elementary and grammar schools at a minimum cost and sacrifice of time and brings into each county an expert training teacher, whose influence on the entire teaching corps will be most salutary.

But how about our High Schools? The fact is the average High School principal never received any pedagogical training. He has been appointed solely because he was a graduate of some college. A lack of pedagogical knowledge is, perhaps, excusable the higher the grade work required to be taught, but we all know the principal of the school which contains the higher grades would be better qualified for his work if he had been given a course in pedagogy. We can easily make provision for at least some of these principalships. The General Assembly makes rather liberal appropriations, annually, for the Johns Hopkins University, Western Maryland, St. John's and Washington Colleges. Some of these scholarships are conditioned on a pledge on the part of the holder of a scholarship to teach for a period of two years. The General Assembly can easily condition the appropriation on the provision that the University or College, receiving a State donation, shall maintain a two years' course in pedagogy, which must be pursued by all students who hold scholarships. This scheme, if put into operation, would be attended by but little additional cost to the State and would provide trained teachers for all the primary and elementary schools, and for the High Schools a supply of teachers who had been given training in professional subjects. However much we may be inclined to extensive preparation and training on the part of those who are to train future citizens, we must consider plans for this preparation which are not too disproportionate with the remuneration our county teachers receive. The time seems ripe for a departure from our present system of preparing and training teachers, and we should go before the next General Assembly with a feasible plan and ask that the same be enacted into law.

REPORT OF MARYLAND STATE NORMAL SCHOOL.

BALTIMORE, MD., August 14, 1907.

HON. M. BATES STEPHENS,

State Superintendent of Public Education, Annapolis, Md.

DEAR SIR—In obedience to the law and in compliance with your request, permit me to hand you herewith my official report for the scholastic year ending July 31, 1907.

Thanking you for your courtesy and co-operation,

Very respectfully yours,

G. W. WARD. *Principal.*

MARYLAND STATE NORMAL SCHOOL. BALTIMORE.

FOUNDED, 1865.

HISTORY.

Maryland was the seventh State to make special provisions for the professional training of teachers by the establishment of a Normal School. By an act of the General Assembly of Maryland of 1865, the Maryland State Normal School was founded. The school was located in the city of Baltimore, and opened for the reception of students January 15th, 1866, under the principalship of the late Professor M. A. Newell.

For nearly forty-one years the school has been in actual operation; for thirty-six years it was the only Normal School in Maryland.

AN EDUCATIONAL CENTER.

Baltimore is the recognized educational center of the South. Student residence among students is a fundamental condition of liberal education. Besides this, students of the Maryland State Normal School have opportunities of hearing the most celebrated lecturers

CLASS OF 1907, MARYLAND STATE NORMAL SCHOOL, BALTIMORE.

in every field of learning, as well as access to libraries containing in the aggregate well toward a million volumes.

FUNCTION OF THE MARYLAND STATE NORMAL SCHOOL.

The recognized function of this school is to train teachers for the public schools of the State. Teacher-training schools are in theory to be sharply distinguished from information-furnishing schools. In practice the distribution cannot be quite so sharp, though it can never be overlooked without disastrous consequences.

SCHOOL ARTICULATION.

Former United States Commissioner of Education, W. T. Harris, holds that the eight grades of the elementary school should perform the definite work of furnishing the instruments of intelligence—this is the child's memory period. The succeeding four grades of the High School while adding to the stock of information should also appeal to and train the reasoning powers. But information is no longer a sufficient qualification for teaching. Whereas, the High School trains to the *acquisition* of knowledge, the Normal School trains in exactly the opposite process, namely, the *imparting* of knowledge—trains in the art of *instruction*. With the raising of the Maryland High Schools to the standard four years' course preceded by eight years in the elementary school, there will disappear the necessity for more information courses in the Maryland State Normal School.

THE MODEL SCHOOL.

This is the elementary school of the standard eight grades which is an organic part of the Maryland State Normal School. Its teachers teach methods in special branches in the Normal School when called upon, and the Normal School teachers put their own theories into practice by teaching classes in the Model School. Seniors do regular systematic teaching in the Model School, and thus graduate with a year's experience—observation, assistance and teaching—in one of the best elementary schools in this or any other State. Insistence upon a high standard for entrance permits a steadily increasing proportion of time to be saved from mere instruction work and given to practical work in the Model School.

A NEW BUILDING NEEDED.

The present building is very much out of repair, and if repaired at great expense would still be ill adapted to present day school work. The school should have a modern building, located on a trolley line near the city limits, where, with a large campus and plenty of light, students could work under far more favorable conditions than at present.

FACULTY.

GEORGE WASHINGTON WARD, PH. D., Principal,
History, Pedagogy.

SARAH E. RICHMOND, Vice-Principal,
Geometry, Pedagogy.

HERBERT E. AUSTIN.
Chemistry, Natural History.

W. J. HOLLOWAY,
Physics, Manual Training.

FLORENCE A. SNYDER,
Drawing.

IDA MASON COX,
Elocution, Physical Training.

MYRTELLE HOPPEN,
Latin.

CAMILLA J. HENKLE,
Geography and Assistant in English

THOMAS L. GIBSON,
English, Vocal Music.

MARY H. SCARBOROUGH,
Mathematics.

MINNIE L. DAVIS,
Principal of Model School.

BELLE UPSHUR,
Primary Work in Model School.

HANNA COALE,
Assistant in Model School.

THE MARYLAND STATE NORMAL SCHOOL.

I. THE NORMAL DEPARTMENT.

This is the real Normal School, the department for which the school was founded, and for which it has been maintained. Since the change several years ago from the old "Junior, Middle and Senior," Classes to the present First Year, Second Year, Junior and Senior Classes, this department has been devoted more and more exclusively to preparation for and practice in teaching. This department contains only two of the four years mentioned above, the Junior and the Senior Years.

SYNOPSIS OF COURSES.*

JUNIOR.

Grammar Reviewed. I.	Physics. II.	Observation in Model
English. II. Written and oral expression.	Geometry Reviewed and Trigonometry or Astron- omy. I.	School. II.
American History. I. (to 1789)	Physiology. II.	Art.
American History. II. (National Period)	Observation in Model School. I.	Music.
Chemistry. I.	Art of Teaching. II.	Elocution.
		Manual Training.
		Physical Training.

SENIOR.

Arithmetic Reviewed. I.	School Law, Management, Etc. II.	Art.
Primary Number Work.	Psychology. I.	Music.
English. II.	Literature of Education. II.	Elocution.
Modern Authors.	Practice Teaching. I.	Manual Training.
Geography Reviewed. I.	Practice Teaching. II.	Physical Training.
Nature Study. II.	Primary Reading. II.	
History of Pedagogy. I.		

*I indicates first half year. II indicates second half year.

II. THE HIGH SCHOOL DEPARTMENT.

This department corresponds to the rural high schools, the First Year and Second Year Classes being equivalent to somewhat more than the last two years of the rural high school. The course of study is practically that of the last two years prescribed by the State Board of Education for rural high schools. The graduates of this department stand on an equal footing with the graduates of "approved high schools," and are of course admitted to the Junior Class of the Normal Department.

SYNOPSIS OF COURSES.*

FIRST YEAR.

Grammar, Rhetoric and Composition. I.	Ancient History. I.	Art.
Rhetoric and Composition. II.	Medieval History. II.	Music.
Agriculture. I.	Algebra. I.	Elocution.
Botany. II.	Geometry. II.	Manual Training.
	Latin. I.	Physical Training.
	Latin. II.	

SECOND YEAR.

History of English Literature. I.	Zoology. I.	Constitution of Maryland. I.
Books prescribed for college entrance.	Physical Geography. II.	Bookkeeping. II.
History of American Literature. II.	Modern Europe. I.	Art.
Books prescribed for college entrance.	Nineteenth Century History. II.	Music.
	Plane Geometry. I.	Elocution.
	Solid Geometry. II.	Manual Training.
	Constitution of United States. I.	Physical Training.

*I indicates first half year. II indicates second half year.

ELEMENTARY SCHOOLS.

This department called the Model School provides the practice necessary for the proper training of Normal students. There are the eight grades with the full curriculum of the standard elementary school together with such additional courses as may be found necessary to prepare deficient students for entrance into the First Year Class, High School Department.

LIST OF GRADUATES, MARYLAND STATE NORMAL SCHOOL, 1906-07.

ALLEGANY COUNTY.	FREDERICK COUNTY.
Gertrude T. Morgan.	Carolyn V. Compton,
BALTIMORE CITY.	Haidée V. Beard.
Nina King,	HARFORD COUNTY.
E. Lucille Minor,	L. Ogarita Webster.
Eunice A. Moore,	HOWARD COUNTY.
Edna M. Wallis,	Edith R. Christian.
Adelaide M. Reardon.	KENT COUNTY.
BALTIMORE COUNTY.	M. Eva Reese.
Margaret Bell,	MONTGOMERY COUNTY.
Madge D. Bowen,	M. Maude Ashton,
Marie C. Daniels,	Annie P. Welsh.
Helen D. Davis,	PRINCE GEORGE'S COUNTY.
Olive B. Moore,	Pearl Lee Boone.
Carrie A. Neepier,	QUEEN ANNE'S COUNTY.
Lida Slade,	M. Ola Bright,
Bernice Slade.	Elva Harrington,
CALVERT COUNTY.	Mabel Ringgold.
N. May Oberry.	ST. MARY'S COUNTY.
CARROLL COUNTY.	Pauline R. Adams,
Blanche E. Cover.	Mazie Dixon McGinley.
CECIL COUNTY.	TALBOT COUNTY.
Katharine M. Bratton,	Jesse Elizabeth Mullikin.
Maude A. Fell.	WICOMICO COUNTY.
CHARLES COUNTY.	Nettie L. Buffington,
Bessie B. Wappen.	Florence Wilson Lowe.
DORCHESTER COUNTY.	WORCESTER COUNTY.
Lillian Jones.	Katherine Pilchard.

NOTE.—The number of graduates shown above is less than half the average graduating class, and less than half the number likely to graduate in 1908; owing to the adding of a year to the course in the High School Department in 1904, which cut off the entries into the Normal Department from that source of supply for one year.

CLASS *of* 1907

CLASS OF 1907. STATE NORMAL SCHOOL NO. 2, PROSBURE.

REPORT OF MARYLAND STATE NORMAL SCHOOL, FROSTBURG.

LETTER OF TRANSMISSION.

FROSTBURG, MD., August 31st, 1907.

M. BATES STEPHENS, PH. D.,

State Superintendent Public Instruction, Annapolis, Md.

SIR:—In accordance with the regulation of the State Board of Education and your request, I beg leave to submit the enclosed matter as my official report for the year ending July 31st, 1907.

Thanking you for many courtesies and able co-operation, I have the honor to be,

Very respectfully,

Your obedient servant,

EDMUND DANDRIDGE MURDAUGH, *Principal.*

REPORT OF THE PRINCIPAL.

NATURE AND FUNCTION.

The special function of the Normal School is, to prepare young men and young women for the profession, teaching. This must be accomplished, first, through thorough and liberal academic work; second, through the study of the child; third, through the study of the philosophy of teaching and school management; and, fourth, through practise and training in the model department.

Therefore, the work of the Normal School differs from that of the college. A college aims to give instruction in the various branches of learning considered as knowledge—to bring about general culture; the Normal School teaches not only the subject matter of the various branches, but also “the processes by which the learning mind acquires knowledge as the resultant of these processes.” Hence, in Frostburg, the effort is made to keep this aim constantly before the student throughout his academic career as a learner. This fact distinguishes the Normal School from other institutions of learning and determines the course of study as well as the distinctive method of teaching in the various branches.

CHARACTERISTICS OF THIS SCHOOL.

A school is known through its dominant characteristics, and its value is determined by its results. This school stands, first of all, for the best that is possible in public school education. It stands for the most practical and the most sensible things that can be done for the boys and the girls of this commonwealth. It is the aim of the Principal to put into the Normal, and, through its graduates, into the public schools, the things that shall be of the greatest benefit to the children in the common schools.

In the second place, this institution stands for hard work and sound scholarship. Those who complete its course of study should have no reason to fear educational tests wheresoever duty calls them. Its graduates should be successful in the great work of teaching, and meet the commendation of their official superiors.

In the third place, this school stands for freedom in method. There are no pet theories to advocate, nor pet hobbies to ride. The members of the faculty must be specialists in their respective lines, and should be granted all freedom that is essential to the highest good in

pedagogical training; hence, they must be alert and ready, striving to attain the best in educational results.

In the fourth place, the school stands for sound morals and high character, beautified and ennobled by "that fine sense which men call courtesy." Students of every creed and degree are welcome, but the daily practise of honorable living, moral dignity, and courteous manners is expected of all alike.

COURSE OF STUDY.

The Course of Study begins in the Freshman year with a careful review of the major subjects of the Common School branches, presented from both the professional and academic view-point—thus, affording twofold advantage to the student. The study of the theory and the art of teaching begins in the Junior year, and continues throughout the remainder of the course. In addition, students will be required before graduation to do observation and practise work in the Model School for at least one hour a day during the last year and a half. *This is the keystone to the arch which Maryland expects her Normal Schools to build.* To those students who may not be able to complete the course, the Freshman and Sophomore years offer excellent opportunity to prepare for examination for teachers' certificates, since they cover the usual high school course.

THE TRAINING SCHOOL.

This department is in charge of scholarly and experienced teachers. Work begins with the primary grades and extends through the seventh year. A pupil may enter, therefore, the first year of the Training School and continue through the grades and classes until, finally, the diploma of the State is granted. Every opportunity is afforded for observation and practise under criticism. Primary manual training, in correlation with other work, is an integral factor.

 Art—Manual Training; Reading; Expression; Music; Physical Education.

REMARKS AND RECOMMENDATIONS.

1. It will be observed that the class of 1907 numbers ten—a falling off from the previous year. This is not unusual in schools. In fact, I could name State Normals of more than five hundred students with graduating classes no larger than ours. It is pleasant to know, however, that the coming class for 1908 will be fully twice as large. We need numbers; but quality is better than quantity. The class of 1907 is a very strong one—perhaps the strongest in our history—and I predict for them success.

2. I must repeat my recommendation of last year concerning the building of a dormitory. It is absolutely necessary, if Frostburg is to be a *State* school. Again last year I could not find satisfactory boarding places in the town for students from a distance. Parents are unwilling to send their children from home, unless they are assured that they will receive proper supervision. That can come only through our having a dormitory under the care of the faculty. Unless we have a dormitory at an early day, our attendance will diminish.

3. Experience shows that there are many now teaching, or who wish to teach, unable to bear the expense of more than one year in school. This—people—can be greatly strengthened and aided through the institution of a one-year “method-review” course based on the common school subjects merely, but supplemented by courses in the theory of teaching and school management with the training of the practise school. At the close and after examination, they might be granted a second grade certificate under the conditions specified in the present State law.

I earnestly commend this subject to your consideration and trust such action will be taken as will permit early announcement of the course.

4. The State provides free text-books for her children from the primary grades through the high schools. Books are also furnished free to students by the colleges receiving State aid. Is it not, then, an anomaly (perhaps an injustice) for students of our State Normals to be compelled to buy their books? Each year there are in the counties' levy, surpluses from the free book fund. A simple amendment to the present law would enable us to give free books to students in the Normals without injury to the common schools. I urge this matter because I believe the passage of such an amendment will increase the number of students in our Normal Schools and add to their efficiency.

CLASS OF 1907, NORMAL DEPARTMENT, WASHINGTON COLLEGE, CHESTERTOWN

REPORT OF NORMAL DEPARTMENT OF WASHINGTON COLLEGE.

September 30, 1907.

The Honorable State Board of Education, Annapolis, Md.

Gentlemen: I have the honor of submitting the following report of the Normal Department of Washington College for the session 1906-1907, together with a summary of the attendance for the session 1907-1908:

There were graduated from the Normal Department on June 19, 1907, fourteen (14), viz:

Estelle Clough Anthony.....	Chestertown, Md.
Lillie Wolford Bounds.....	Quantico, Md.
Mary Reed Clark.....	Church Hill, Md.
Rose Hyder Duyer.....	Chestertown, Md.
Pauline Kennet Goslee.....	Salisbury, Md.
Viola Miriam Goslee.....	Salisbury, Md.
Mabel Washington Hayman.....	Delmar, Del.
Hilda Howard.....	Hebron, Md.
Novilla Page Kirby.....	Easton, Md.
Emma Magdaline Merriken.....	Hobbs, Md.
Adele Cora Moffett.....	Chestertown, Md.
Emma Whittington Ralph.....	Cambridge, Md.
Evolyn Sudler Rolph.....	Millington, Md.
Annie Ethel Sparks.....	Crumpton, Md.

The above students satisfied all the requirements of the curriculum, and gave good promise of ability to govern and to teach. I think all have secured positions as teachers in this State. As the graduation of one of these students has been commented upon by one of the County Superintendents, I think it proper to report the circumstances to your Honorable Board. The young woman referred to applied for admission, as a graduate of one of the accredited High Schools, and had matriculated and entered upon her work before it was discovered that she was not of the legal age. As she had shown herself to be a diligent and satisfactory student, it was considered that less wrong would be done by allowing her to graduate, than by withholding her diploma until she attained the legal age. Since this occurrence, the legal requirements for admission and graduation are being strictly enforced.

We are, as is doubtless known to Your Honorable Board, still falling short of the prescribed curriculum in the matter of practice

teaching. I hope that this year will develop some way by which this very important part of the course can be carried out. As I stated in a previous report, I see no satisfactory way for solving the difficulty, except by the erection and maintenance of a training school in connection with the Normal Department of the college; no satisfactory arrangement with the county school authorities seems possible. To erect and maintain a training school would require the increase of the annual appropriation, as the present appropriation by no means covers the expenses already incurred in connection with this department.

In all other respects the work of the school is progressing in a very satisfactory manner. The committee of Your Honorable Board which visited the school last spring was afforded every facility for investigating the work, and was, I believe, favorably impressed by what they saw. The opening of William Smith Hall, with the most thorough equipment in every detail, will greatly aid in the training of teachers, and the good results of the better facilities are already manifesting themselves.

The department opened for the session 1907-1908 with the following enrollment:

Senior Class.....	10	First Academic Class.....	2
Junior Class.....	9		
Second Academic Class.....	22	Total.....	43

The above are all well prepared for the classes in which they are entered, and I look forward to a successful year in the Normal Department of the college. I send by this mail, under separate cover, a catalogue of the college.

Very respectfully submitted,

JAS. W. CAIN, *President.*

MARYLAND SCHOOL ANNIVERSARIES.

AUTHORIZED BY LAW.

In compliance with the law "Washington's Birthday," "Maryland Day," and "Arbor and Bird Day" were appropriately celebrated in all of the schools.

The wisdom of the Legislature in making these occasions days of special exercises instead of school holidays is already manifesting itself in the increased interest on the part of both teachers and pupils in the subjects thus emphasized.

As usual an anniversary pamphlet was published and distributed to all of the schools in the State. In addition to about fifty pages of selected material suitable for these exercises, it contained the following foreword and suggestive programs:

FOREWORD.

In obedience to the requirements of the Public School Law, which makes provision for three public school anniversaries, I am sending out this pamphlet to the teachers and school officers as a helpful aid in observing them properly. These school anniversaries are not school holidays. The framers of the law who provided for them had in mind definite purposes which they should accomplish, and influences they should accentuate, which the ordinary routine of school work fails to emphasize. For each anniversary there must be *preparation*. The first anniversary—February 22nd—is no longer a holiday for the commemoration of heroic deeds, but a red-letter school anniversary, where we celebrate with speech, song, flag-drill, essay, recitation and poem until the young minds are aglow with high ideals and the young hearts are burning with keen admiration for heroic deeds and noble traits. Washington and Lincoln were both born in February—both great American statesmen of our highest type. Our pupils should desire to emulate them. Let it be understood that these men started in life just as very many of our boys and girls are now starting. They had difficulties to surmount and the secret of their being able to overcome obstacles was the fact that each had lofty ideals and possessed the courage to work unflinchingly to attain them.

The same idea holds true in regard to the observance of the other two anniversaries, viz.: Maryland Day, Monday, March 25th, and Arbor and Bird Day, which will probably be observed on Friday, April 12th.

For Maryland Day it is important to have a speaker who will talk on the special topic and bring out as much historical information as is possible in a half-hour's address. All patrons and friends should be earnestly urged to attend. Make this anniversary the most patriotic occasion of the year. Remember it is *the* day for an expression of what has been learned about our good old State during the year, and also for an intensive study of one special topic of her history.

Arbor and Bird Day should bring suggestions and inspire enthusiasm for those things that are to live and grow. We must keep our pupils close to nature. The Nature Study and much other science work of the school during the year should point to this day. This knowledge must express

itself in more beautiful school grounds, with their shade trees, vines, and, possibly, school gardens. Let the approaching Arbor and Bird Day give an emphasis to this part of our work such as we have not before felt.

WASHINGTON'S BIRTHDAY.

FRIDAY, FEBRUARY 22, 1907.

SUGGESTIVE PROGRAM.

1. Scriptural Reading—By the Principal.
2. Song—"America"—By the School.
3. Roll Call—Pupils respond by giving patriotic quotations.
4. Address—"The Day We Celebrate"—By a Trustee.
5. Reading—"Washington and Lincoln"—By a Seventh Grade Pupil.
6. Recitation—"What Constitutes a State"—By a Pupil.
7. Song—"Maryland, My Maryland"—By the School.
8. Essay—"Washington, The Soldier"—By a Pupil.
9. Essay—"Washington, The Statesman"—By a Pupil.
10. Reading—"Sketch of The Flag"—By a Pupil.
11. Recitation—"Our Flag" (Sumner)—By a Pupil.
12. A Flag Drill—By the Pupils
13. Recitation—"The 22nd of February"—By a Pupil.
14. Reading—Tennyson's "In Memoriam"—By a Pupil.
15. Address—By a Patron.
16. Song—"The Star-Spangled Banner"—By the School.

To the Principal: Very little material is included herewith for the observance of Washington's Birthday. Many books of our school library contain all the history and biography you need for the program. The February number of your school magazines will likely contain much helpful material. The program may very appropriately include some material bearing on the life and services of Abraham Lincoln, whose birthday occurs in February also. Many of our schools close before June 14—Flag Day—and this program includes a short sketch of the Flag.

ARBOR AND BIRD DAY.

SUGGESTIVE PROGRAM.

1. Song.
2. Devotional Exercises.
3. Reading of the Governor's Proclamation.
4. Roll Call, with appropriate quotations.
5. Reading—"History of Arbor Day."
6. Recitation—"A Forest Hymn"—W. C. Bryant.
7. Recitation—"A Spring Meeting."
8. Recitation—"Millions Under the Ground."
9. Essay—"A Retrospect of Our School Grounds Improvement."
10. Song.
11. Reading—"Improvement of School Grounds"—Bailey.
12. Reading—"Beautifying Grounds," followed by a discussion.
13. Some Noted Trees—Short Talks.
14. Recitation—"Mrs. Wasp and Mrs. Bee."
15. Recitation—"Little Peach Blossom."
16. Recitation—"A Little Sermon to Boys."
17. Planting Exercises.
18. Song.

PROCEEDINGS MARYLAND STATE TEACHERS'
ASSOCIATION—FORTIETH ANNUAL MEET-
ING, JUNE 25, 26, 27, 1907.

REPORT BY HUGH W. CALDWELL, RECORDING SECRETARY
MARYLAND STATE TEACHERS' ASSOCIATION.

FORTIETH ANNUAL MEETING, JUNE 25, 26, 27, 1907.

Early in December last, the Executive Committee of the Maryland State Teachers' Association requested the Secretary to send return postal cards to each member of the Association, thus giving an opportunity to vote as to whether the meeting this year should be held at Ocean City or Jamestown. The members of the Association voted almost unanimously to hold the next meeting at the Jamestown Exposition.

The first session was held Tuesday night as usual, and there was a session each morning, the afternoons and evenings being left open for sightseeing.

The "Inside Inn" was used as the headquarters of the Association, and the meetings were held in the "Convention Hall" at the Inn.

The attendance was very good and the number of members this year will probably exceed that enrolled for any previous year. At this writing the list is not quite complete.

Dr. M. Bates Stephens presented Secretary H. E. Austin's "Report of the Reading Circle." The "Report" shows an enrollment of 830, a slight falling off from the membership of 893, reported last year. The counties of Allegany, Frederick, Kent, and Montgomery, show increases in membership of 70, 39, 100, and 56 per cent. respectively. Cecil and Wicomico counties, which have been for several years close rivals in reporting the highest percentage of their teachers enrolled, changed places this year. Wicomico reported 100 per cent. enrolled and Cecil 95 per cent.

The publishers of the "Maryland Educational Journal" proposed two changes in the paper. One was to change the name to the "Atlantic Educational Journal," and the other to raise the subscription from 50 cents to \$1.00. The Executive Committee

approved the propositions and the change was adopted by the Association.

Resolutions of thanks to the officers and committees, to the speakers and musical directors were carried. A committee was appointed to prepare memorials to the late Messrs. E. L. Boblitz, L. L. Beatty, L. J. Handy, Z. C. Ebaugh, and W. G. Smith.

As the full report is to be printed in booklet form and sent to each member, it is not necessary to give a long report here.

The program was as follows:

TUESDAY, JUNE 25, 8.30 P. M.

Singing by the Association.

Prof. Thomas L. Gibson, Maryland State Normal School Director.

Opening Address.....Edwin Warfield, Governor of Maryland.

Singing by the Association.

President's Address....Dr. James W. Cain, President of Washington College.

WEDNESDAY MORNING, JUNE 26, 10 O'CLOCK.

Singing by the Association.

Address.....State Superintendent J. D. Eggleston, Jr., of Virginia.

Singing by the Association.

Address.....State Superintendent M. Bates Stephens, of Maryland.

Singing by the Association.

THURSDAY MORNING, JUNE 27, 10 O'CLOCK.

Singing by the Association.

Address: "The Modern Conception of Education".....Dr. C. J. France,
Department of Pedagogy, Baltimore City College.

Singing by the Association.

"Story Telling: Its Place in Education".....Miss Nan L. Mildren,
Supervisor of Primary Work, Caroline County, Md.

Singing by the Association.

"Agriculture in the Schools".....Mr. H. O. Sampson,
U. S. Department of Agriculture, Washington, D. C.

FRIDAY MORNING, JUNE 28, 10 O'CLOCK.*

Business Session.

(Place to be announced.)

Reports.

Miscellaneous Business.

Election of Officers.

Adjournment.

* This meeting was combined with the meeting Thursday morning.

OFFICERS OF THE ASSOCIATION.

1906-1907.

President—Dr. J. W. Cain, Chestertown.
 Vice-President—Hon. James W. Thomas, Cumberland.
 Second Vice-President—Rev. F. T. Griffith, Rockville, Montgomery County.
 Recording Secretary—Hugh W. Caldwell, Chesapeake City.
 Treasurer—John E. McCahan, Baltimore City.
 Corresponding Secretary—Miss S. Elizabeth Meade, Ellicott City.
 Executive Committee—Albert S. Cook, Towson, Chairman; Dr. Roszel Berryman, Baltimore City; E. M. Noble, Denton; Miss Anna E. Johnston, Ellicott City; Miss Mary K. Rogers, Sparrows Point.

The following officers were elected for 1907-1908:

President—Albert S. Cook, Towson.
 Vice-President—George H. Lamar, Rockville.
 Second Vice-President—George Biddle, Elkton.
 Recording Secretary—Hugh W. Caldwell, Chesapeake City.
 Treasurer—John E. McCahan, Baltimore.
 Corresponding Secretary—Elizabeth Meade, Ellicott City.
 Executive Committee—Sarah E. Richmond, Baltimore.
 Dr. R. Berryman, Baltimore.
 Woodland C. Phillips, Savage.
 Annie E. Johnston, Ellicott City.
 E. H. Norman, Baltimore.

STANDING COMMITTEES OF THE MARYLAND STATE
 TEACHERS' ASSOCIATION FOR SESSION 1907-08.

APPOINTED BY JAMES W. CAIN, LL. D., PRESIDENT.

Modern Languages:

J. W. Huffington, Chairman, Salisbury.
 Charles F. Raddatz, Baltimore.
 Ward Wilson, Baltimore.
 Theora J. Bunnell, Reisterstown.
 C. E. Carl, Hagerstown.

Natural Science:

Irving L. Twilley, Chairman, Baltimore.
 Helen G. Wilkins, Severn.
 Roger I. Manning, Laurel.
 John T. Hershner, Towson.
 A. C. Humphreys, New Market.

Kindergarden:

Ada Scott, Chairman, Salisbury.
 Pearl Mercer, Woodbine.
 Inez Johnson, Frostburg.
 Harriet E. Luhn, Annapolis.
 Mary E. Sherwood, Sparrows Point.

Esthetics:

Sarah E. Richmond, Chairman, Baltimore.
 Hyna De Haven, Eilerslie.
 Julia McDuell, Weverton.
 Clyde B. Stouffer, Hagerstown.
 D'Arcy Barnett, Cambridge.

Mathematics:

E. B. Fockler, Chairman, North East.
 John I. Coulbourn, Havre de Grace.
 Albert S. Cook, Towson.
 Edward M. Noble, Denton.

Physical Training:

Rowland Watts, Chairman, Baltimore.
 Agnes McLean, Baltimore.
 Nellie Slye, Darlington.
 India Rowland, Baltimore.
 Margaret Williams, Frostburg.

Manual Training:

E. A. Hidey, Chairman, Westminster.
 Carroll Edgar, Elkton.
 John T. Bruehl, Centreville.
 Alexander Chaplain, Easton.
 Albert L. Farver, Cambridge.

Enrollment:

Viola Hepburn, Chairman, Lonaconing.
 Stelle L. Hoskin, Frostburg.
 Addie Talbott, Baltimore City.
 Lyda Tall, Baltimore City.
 S. Elizabeth Meade, Howard Co.

Auditing:

Thomas C. Bruff, Towson.
 Anna Hanson, Frostburg.
 Annie E. Johnston, Ellicott City.

Resolutions:

A. F. Galbreath, Chairman, Darlington.
 Dr. M. Bates Stephens, Annapolis.
 Elsie M. Penning, Havre de Grace.
 Julia F. Bratten, Snow Hill.

School Legislation, Administration and Supervision:

Dr. M. Bates Stephens, Chairman, Annapolis.
 W. H. Dashiell, Princess Anne.
 A. C. Willison, Cumberland.
 W. C. Phillips, Savage.
 James H. Van Sickle, Baltimore.

Elementary Schools:

Honora Birmingham, Chairman, Barton.
 Joseph C. Blair, Sparrows Point.
 Addie M. Dean, St. Michaels.
 Mary B. Pusey, Pocomoke City.
 B. F. Conrad, Hagerstown.

Secondary Schools:

Howard C. Hill, Chairman, Cumberland.
 N. Price Turner, Salisbury.
 Sydney S. Handy, Easton.
 Margaret M. Robinson, Frederick.
 H. R. Wallis, Annapolis.

English:

Samuel M. North, Chairman, Baltimore.
 Olin R. Rice, Westminster.
 Ida L. Lockard, Westminster.
 Bessie L. Gambrill, Alberton.
 Mary L. Thomas, Hancock.

Geography:

Alice McDaniel, Chairman, Easton.
 B. F. Fleagle, Hampstead.
 Florence Albert, Hagerstown.
 Minnie Purphy, Popular Springs.
 Pearl Bristow, Havre de Grace.

History:

J. Montgomery Gambrill, Chairman, Baltimore.
 George W. Ward, Baltimore.
 W. H. Tolson, Baltimore.
 Helena Link, Perryman.
 Sallie Adams, Hagerstown.

Maryland State Reading Circle:

Sarah E. Richmond, Baltimore.
 Mary E. Ford.

JOHN E. McCAHAN, *Treasurer,*

WORK OF MANUAL TRAINING SCHOOL AT LAUREL, MD.

CHAIRS MADE BY LAUREL MANUAL TRAINING SCHOOL FOR MARYLAND BUILDING, JAMESTOWN EXPOSITION.

REPORT OF INSPECTION OF MANUAL TRAINING AND COLORED INDUSTRIAL SCHOOLS.

ALLEGANY COUNTY MANUAL TRAINING DEPARTMENT.

(Allegany County High School).

Myron E. Bailey, Instructor.

Not well lighted.	a month to teachers of fifth and sixth grades. He does not visit other schools. This work is done by Miss Parker.
Total enrollment of pupils, 180.	Amount of appropriation recommended, \$1,500.
Average attendance, 60.	Remarks: Work shows steady improvement. Much yet to be done.
Grades taught, 6th to 10th, inclusive.	Inspection made April 17, 1907.
Number of desks, 12.	
Material and tools in good condition.	
State course partially followed.	
Other schools of county visited by instructor—He gives instruction once	

CUMBERLAND (COLORED) SCHOOL MANUAL TRAINING DEPARTMENT.

(Cumberland Colored School).

J. W. Owens, Instructor.

Total enrollment of pupils, 75.	Recommendations: Work purely manual training and borders on carpentry as a trade.
Average attendance, 36.	Inspection made April 17, 1907.
Grades taught, 2nd to 8th, inclusive.	

ANNE ARUNDEL COUNTY MANUAL TRAINING DEPARTMENT.

(Annapolis High School).

Garey Lambert, Instructor.

Well lighted.	State course followed.
Total enrollment of pupils, 333.	Drawing taught by manual training instructor.
Average attendance, 82.	Amount of appropriation recommended, \$1,500.
Grades taught, 5th to 9th, inclusive.	
Number of desks, 20.	
Materials and tools, 256.	

ANNE ARUNDEL COUNTY INDUSTRIAL TRAINING DEPARTMENT.

(Annapolis Colored School).

Estelle V. Kennedy, Instructor.

Size of rooms (two), 20x34.	Recommendations: The work should be confined to higher grades and should include boys as well as girls.
Well lighted.	Remarks: The work consists of sewing and cooking of the most elemental character.
Total enrollment of pupils, 96.	Inspection made January 9, 1907.
Average attendance, 68.	
Grades taught, 2nd to 7th, inclusive.	
Number of desks, 25.	
Materials and tools good, but limited in quantity.	

BALTIMORE COUNTY MANUAL TRAINING DEPARTMENT.

(Sparrows Point School).

D. Fred Shamburger, Instructor.

Size of room, 30x40.	Number of desks, 16.
Well lighted.	Other schools of county visited by instructor—Towson High School.
Total enrollment of pupils, 174.	Amount of appropriation recommended, \$1,500.
Average attendance, 147.9.	Remarks: The Maryland Steel Company furnishes power gratis which greatly facilitates the work here.
Grades taught, 4th to 8th, inclusive.	Inspection made March 5, 1907.
Materials and tools in excellent condition.	
Drawing taught by manual training instructor.	

BALTIMORE COUNTY INDUSTRIAL TRAINING DEPARTMENT.

(Catonsville Colored School).

Bertha D. Stokes, Instructor.

Size of room, 25x30.	Number of desks, 15.
Well lighted.	Remarks: Drawing and water color, paper folding, cardboard construction, raphia basketry, chair caning, cooking and sewing are taught and excellent work is being done.
Total enrollment of pupils, 200.	Amount of appropriation recommended, \$1,500.
Average attendance, 175.	Inspection made May 14, 1907.
Grades taught, 1st to 8th, inclusive.	
Materials and tools sufficient and in excellent condition.	
Drawing taught by manual training instructor.	

CAROLINE COUNTY MANUAL TRAINING DEPARTMENT.

(Caroline County High School).

George S. Hayes, Instructor.

Well lighted.	by Mr. Hayes, but Miss Nan Mil-dren, primary manual training instructor, visits all the larger schools of the county and gives instruction in primary construction work.
Total enrollment of pupils, 187.	Amount of appropriation recommended, \$1,500.
Average attendance, 153.	Inspection made November 16, 1906.
Grades taught, 5th to 10th, inclusive.	
State course followed.	
Drawing taught by manual training instructor.	
Other schools of county visited by instructor—No other schools visited	

CAROLINE COUNTY (COLORED) INDUSTRIAL TRAINING DEPARTMENT.

(Denton Colored School).

Joseph C. Briscoe and Lucretia Kennard, Instructors.

Well lighted.	(Other schools of county visited by instructor—Other teachers receive instruction and several were sent to Hampton Institute.
Total enrollment of pupils, 57.	Recommendations: More places of industrial training should be introduced.
Average attendance, 45.	Amount of appropriation recommended, \$1,500.
Grades taught, 2nd to 7th, inclusive.	
State course prescribed by school authorities followed.	
Drawing taught by manual training instructor.	
Inspection made November 16, 1906.	

CARROLL COUNTY MANUAL TRAINING DEPARTMENT.

(Westminster High School)

Everett A. Hidey, Instructor.

Size of room, 25x28.	Drawing taught by manual training instructor.
Well lighted.	Recommendations: One day each week should be given, respectively, to Union Bridge and Manchester.
Total enrollment of pupils, 224.	Amount of appropriation recommended, \$1,500.
Average attendance, 160.	Inspection made May, 1907.
Grades taught, 5th to 10th, inclusive.	
Number of desks, 20.	
Materials and tools, good supply.	
State course followed.	

CECIL COUNTY MANUAL TRAINING DEPARTMENT.

(Cecil County High School).

Carroll Edgar, Instructor.

Well lighted.	State course followed
Total enrollment of pupils, 150.	Other schools of county visited by instructor—North East.
Average attendance, 100.	Amount of appropriation recommended, \$1,500.
Grades taught, 7th to 10th, inclusive.	Inspection made November 15, 1906.
Drawing taught by manual training instructor.	

CECIL COUNTY (COLORED) INDUSTRIAL TRAINING DEPARTMENT.

(Elkton Colored School).

Daisy H. Cuney, Instructor.

Well lighted.	Grades taught, 1st to 6th, inclusive.
Total enrollment of pupils, 50.	Amount of appropriation recommended, \$1,500.
Average attendance, 40.	Inspection made November 15, 1906.
Drawing taught by manual training instructor.	

CHARLES COUNTY MANUAL TRAINING DEPARTMENT.

(McDonough School).

Mrs. A. M. Isanogle, Instructor.

Total enrollment of pupils, 27.	Other schools of county visited by instructor—Bel Alton.
Average attendance, 27.	Remarks: Bel Alton visited weekly; 17 pupils; 10 double desks; size room, 20x40.
All grades taught.	Inspection made April 29, 1907.
Materials and tools in good condition.	
State course partially followed.

Other schools of county visited by instructor—Gaithersburg and Kensington.
Amount of appropriation recommended, \$1,500.
Inspection made April, 1907.

PRINCE GEORGE COUNTY MANUAL TRAINING DEPARTMENT.

(Laurel High School).

James G. Boss, Instructor.

Size of rooms, two, each 23x29.

Well lighted.

Total enrollment of pupils, 86.

Average attendance, 75.

Grades taught, 5th to 10th, inclusive.

Number of desks, 14.

Materials and tools in good condition.

Only mechanical drawing taught by manual training instructor.

Recommendations: Work could practically be extended to boys of

higher grades at Hyattsville by instructor spending one day per week there.

Amount of appropriation recommended, \$1,500.

Remarks: Instructor now spends entire time in manual training work, which fact has improved condition of work.

Inspection made January 10, 1907.

QUEEN ANNE COUNTY MANUAL TRAINING DEPARTMENT.

(Centreville High School).

John T. Bruehl, Instructor.

Total enrollment of pupils, 152.

Average attendance, 135.

Grades taught, 4th to 10th, inclusive.

Number of desks, 16.

Materials and tools good.

Drawing taught by manual training instructor.

State course very nearly followed.

Amount of appropriation recommended, \$1,500.

Remarks: Manual training teacher now devotes all his time to manual training.

Inspection made November 21, 1906.

SOMERSET COUNTY MANUAL TRAINING DEPARTMENT.

(Crisfield High School).

Iris G. Prouty, Instructor.

Total enrollment of pupils, 339.

Average attendance, 120.

Grades taught, 5th and all above.

State course followed.

Drawing taught by manual training instructor.

Other schools of county visited by instructor—Princess Anne, and the Grammar School at Crisfield.

Amount of appropriation recommended, \$1,500.

Inspection made November, 1906.

TALBOT COUNTY MANUAL TRAINING DEPARTMENT.

(Easton High School).

Miss Gertrude J. Widener, Instructor.

Well lighted.

Total enrollment of pupils, 75.

Average attendance, 70.

Grades taught, 6th to 10th (boys).

Number of desks, 24.

Materials and tools—Good supply.

State course is the basis of all work.

Drawing taught by manual training instructor.

Recommendations: Inasmuch as the girls are not given manual training, course in domestic science should be given for their benefit.

Amount of appropriation recommended, \$1,500.

Remarks: Work of department much improved over that for past year.

Inspection made May 8, 1907.

TALBOT COUNTY (COLORED) INDUSTRIAL TRAINING DEPARTMENT.

(Easton Colored School).

Nellie E. Turner and Mary A. Stewart, Instructors.

Size of rooms, 16x36 and 16x24.

Well lighted.

Total enrollment of pupils, 88.

Average attendance, 79.

Grades taught, 5th to 8th, inclusive.

Number of sewing machines, 4. Wil-

low basket making tools complete.

Amount of appropriation recom-

mended, \$1,500.

Inspection made May, 1907.

WASHINGTON COUNTY INDUSTRIAL TRAINING DEPARTMENT.

(Hagerstown High School).

Luther Forsyth, Instructor.

Size of room, 48x20.

Total enrollment of pupils, 151.

Average attendance, 92%.

Grades taught, 6th to 10th, inclusive.

Number of desks, 15 double.

Materials and tools—desks well equipped—card board, wood, metal, clay and raffia.

State course followed; also much additional work is done.

Both mechanical and freehand drawing taught by manual training instructor.

Other schools of county visited by in-

structor—This being our first year

the fund would not permit of further extension.

Amount of appropriation recom-

mended, \$1,500, or more, for extending the work.

Remarks: Manual training has given satisfaction generally and we feel that this year will be an improvement over last.

Inspection made September 22, 1906.

WASHINGTON COUNTY INDUSTRIAL TRAINING DEPARTMENT.

(Hagerstown Industrial School).

Beatrice Carroll, Instructor.

Size of room, 24x28.

Well lighted.

Total enrollment of pupils, 112.

Average attendance, 82%.

Grades taught, 1st to 7th, inclusive.

Number of desks, 24.

Materials and tools—Sewing machine, scissors, thimbles, needles, etc.; cook stove and cooking uten-

sils, laundry outfit, china closet and set of dishes; 14 Lloyd benches and equipment.

State course followed.

Drawing taught by manual training instructor.

Amount of appropriation recommended, \$1,500.

Inspection made September 22, 1906.

WICOMICO COUNTY MANUAL TRAINING DEPARTMENT.

(Salisbury High School).

Size of room, 55x70.

Well lighted.

Total enrollment of pupils, 335.

Average attendance, 200.

Grades taught, 5th to 10th, inclusive.

Number of desks, 20.

Materials and tools in good condition.

State course followed.

Drawing taught by manual training instructor.

Other schools of county visited by instructor—Intermediate and primary schools of Salisbury.

Amount of appropriation recommended, \$1,500.

Inspection made April, 1907.

REPORT OF PROCEEDINGS OF MANUAL TRAINING TEACHERS' ASSOCIATION OF MARYLAND.

The regular Autumnal Semi-annual meeting of the Association was held December 8th, 1906, at the Maryland State Normal School, Baltimore, Md., the President, Mr. Carroll Edgar, of Elkton, presiding.

Mr. Edgar in his opening address to the Association stated that Dr. Stephens desired an exhibition of the work of the Manual Training School to be prepared for the Jamestown Exposition, suggesting that the Association select one of its members to carry out the plan and place the exhibit in the Maryland Building.

A motion by Mr. Holloway, of the State Normal School, amended by Mr. Boss, of Laurel, providing for the election of a committee of three to select the models for exhibition, and authorizing the Chairman to take the exhibit to Jamestown and properly arrange it, resulted in the following selection:

Carroll Edgar, Chairman.

George M. Gaither.

W. J. Holloway.

After the transaction of routine business, Mr. L. Forsythe and Mr. Boss extended invitations to the Association to hold its next meeting in Hagerstown and Laurel, respectively.

Mr. Forsythe's invitation was accepted and the Association adjourned to meet in the Spring of 1907 at Hagerstown.

The original plan for an exhibition of Manual Training work at Jamestown was subsequently altered; the State-Board of Education requesting the Teachers to send uniform models in the shape of furniture, of colonial pattern, Flemish oak design, for the Committee Room of the Maryland Building.

Committee tables, large arm chairs, hall clocks, hat-stands and umbrella-stands are examples of the contributions; and being uniform in design and finish made an excellent and representative exhibition.

Colonial or Mission furniture affords many excellent exercises for advanced woodwork construction, combining all the essentials of both good construction and adaptability to the exigencies of the schoolroom, viz: simplicity, strength, beauty and utility, and is

rapidly gaining favor with Manual Training teachers, for the reasons cited above, and because of the great interest it excites in the pupils.

Several new Manual Training Schools have been started in the past year, and the general value of the work is steadily increasing through a better understanding by the public and greater efficiency in the teachers.

REPORT OF COMMITTEE ON EDUCATION OF COLORED YOUTH IN MARYLAND.

APPOINTED BY STATE BOARD OF EDUCATION DECEMBER 5, 1906.

To the Honorable, the State Board of Education:

The undersigned Committee of your Honorable Board, appointed April 30, 1907, to investigate the methods of instruction in vogue at the most approved industrial and agricultural schools in this country for the education of colored youth, and to report to your Honorable Board with recommendations for such changes in our methods of teaching colored youth as the Committee deemed feasible and adapted to promote the usefulness, happiness and welfare of the colored people in this State, beg leave to report as follows:

1. Your Committee have inquired into the character of instruction given at Tuskegee Institute, at Hampton Normal School and at other leading schools for the education of negro youth, and find that the great aim of all these institutions is to fit colored children for the occupations in life which they are likely to pursue after leaving school.

2. Thus, your Committee communicated with Booker T. Washington, the efficient head of Tuskegee Institute, and received from him a most interesting letter from which the following extract is taken:

We began first to study the needs and conditions of our people in this part of the South—that is, we found out in what direction the masses of these people were actually engaged. We found out that the majority were engaged in agricultural pursuits of one kind and another. Another large portion were engaged in household service of one kind or another, and still another large element were engaged in mechanical work. We have sought to prepare people not only to do the actual work, but also to train persons who could instruct others in these industries, in public schools and in smaller schools. We have now gotten to the point where nearly half the public schools have farming, gardening, sewing, cooking, table serving, etc., taught. We feel that we are now beginning to reach the masses of the people.

3. In a bulletin of Hampton School it is stated that General S. C. Armstrong, the first principal and leading spirit of that school, declared it to be his conviction that,—

“What the negro needs at once is elementary education and moral development. The race will succeed or fail,” said he, “as it shall devote itself with energy to agriculture and the mechanic arts or avoid these pursuits, and its teachers must be inspired with the spirit of hard work and acquainted with the means that tend to material success.”

DOMESTIC SCIENCE CLASS, COLORED INDUSTRIAL SCHOOL. (Denton, Md.)

MANUAL TRAINING CLASS, COLORED INDUSTRIAL SCHOOL. (Denton, Md.)

After a somewhat thorough investigation of the whole subject of negro education, your Committee are convinced that the surest means of improving and advancing the negro race is to teach it to perform faithful and efficient service in some industrial occupation, such as agriculture, domestic service, or the mechanic arts.

In this connection your Committee desire to record the words of a negro school teacher on this subject. He was accustomed after school hours and during vacation to put on his overalls and work in the fields, or with pick and shovel, for which he was condemned by members of his race, as they contended that a man who worked with pick and shovel was not fit for a school teacher. But to these criticisms he replied: "Such criticisms only create sorrow in my heart for the foolishness of so many of my race. Labor," said he, "is not only a necessity but a blessing. Only the idler feels it to be a curse; hence, I do not like the doctrine taught by these critics. To these evil teachings we can trace nearly all the turmoils, strifes and sufferings of the negro. As a weak race, let us elevate and better our condition by personal effort. Do not ask for sympathy, but by our honest and reliable service demand justice. Cultivate the farm, exalt the plow, lift up the dish cloth, magnify the power of the broom, and do not betray our trust. Teach that labor in its most abject form degrades no man, but that man must lift up labor and magnify it. I want to be known as an honest, industrious and reliable negro. I insist that our boys and girls be taught the dignity of labor, which will pave the way to intelligent, industrious and independent citizenship."

Your Committee are persuaded that there is much truth and force in these homely observations.

The question arises then, what can the public schools in Maryland do to bring about a realization by the colored people of the value of such precepts and how can they best be put into practical operation?

Your Committee have kept in view the fact that the colored people, in a sense, are still the wards of the State and that it is the duty of the State to teach them with patience and kindness the things that will fit them for their mission in life and at the same time promote their own true and substantial welfare and happiness.

Were it feasible your Committee would recommend the establishment of a department in every colored public school where the boys and girls could be trained in industrial pursuits. For the present such a plan is not deemed practicable or feasible, but your Committee earnestly recommend County School Boards to use all funds

appropriated for colored Industrial schools to the purpose for which they are intended.

For the present, therefore, your Committee must content themselves with recommending that the State Superintendent in co-operation with the County Superintendents, by printed instructions and at teachers' institutes, impress upon colored teachers the views and convictions of your Committee as herein set forth. Urging them to instruct the pupils under their care in practical things. Let them read to their pupils the printed recommendations of the Superintendent and insist upon their learning to do well and thoroughly whatever useful service their hands find to do, as the surest means to their advancement.

Teach them that mere book learning will avail them but little in the battle of life; that they must expect to fulfill the ordinance of the Creator who declared that "in the sweat of thy face shalt thou eat bread"; teach them that ease and rest and pleasure are good things only when they come as the reward of work well done; that agriculture is a great industry and that farm labor is a most worthy and useful employment; that all labor is honorable; that domestic service is indispensable in every household and that its performance faithfully, honestly and efficiently is not only commendable but contributes to the sum of human happiness; that as they expect to dwell permanently in close neighborhood to their white brethren they should strive to gain the good will and respect of these white brethren; that they must not depend upon any mere statute law to make them better or more respected citizens, but that they must work out their own advancement; that the honest acquisition of property is an evidenced progress; that thrift will add to their own self-respect and the respect of others; that moral development and the spirit of hard work are indispensable, for in the practice of these lies their surest means of prosperity and happiness. Your Committee realize that these precepts are not new and that they are applicable alike to all races and conditions of men, but they are persuaded that the environment of the colored youth is such as to demand that these precepts be given special attention in our public schools. By the steady inculcation of these precepts a wholesome transition may gradually be brought about in the views of the colored people regarding the problems of life. A very little observation will prove to them that success is achieved more surely by steady, honest and sober industry in some useful employment than in any other way, and that the allurements of the various learned

professions are mere will-o'-the-wisps that lead to quagmires and despondency, with but few exceptions.

If the masses of the negro race can be taught to take a sensible and practical view of things in accordance with the teachings of their sincere well-wishers, a good beginning in the right direction will at least be made. And teachers in our schools may, so far as practicable, teach the children how to do many useful things to their advantage.

Your Committee are aware that many of the teachers in our public schools for colored children are themselves deficient in training for the work here outlined for them and that they are in many instances unsympathetic with the idea that industrial and moral instruction and hard work are necessary to the advancement of the race.

While, therefore, your Committee do not deem it feasible to establish in every community colored industrial schools for colored children, where the boys may be taught farming and useful trades; and where the girls may be taught cooking, sewing, table serving, laundrying, and the like, they do deem it feasible and important that a training school for colored teachers be established where these practical things may be taught and where the right precepts for the betterment of the race may be thoroughly inculcated. Such a school should be located in the country accessible from all parts of the State, and here real teachers for the colored people could be trained. They would, in the words of General Armstrong, become "inspired with the spirit of hard work and acquainted with the means that tend to material success." They would learn that "manual labor is not only a necessity but a blessing," and they would carry this spirit of industry and enterprise into the school room for the benefit of their pupils.

Thus gradually it is hoped the masses could be brought to accept these wise and helpful influences, and the future give promise of the races dwelling here together in peace and harmony and with mutual respect, kindness and good will.

(Signed): GLENN H. WORTHINGTON,
RUFUS K. WOOD,
WILLIAM S. POWELL.

REVISED COURSE OF STUDY CONTAINING
ELEVEN YEAR GRADES, ADOPTED BY
THE STATE BOARD OF EDU-
CATION, JUNE 27, 1907.

In obedience to many requests from school officials and teachers, asking that more time be given to the completion of the Course of Study, the State Board of Education at its meeting held at Jamestown, Va., on June 27, 1907, decided to extend the course to cover eleven years, and divided into as many grades. There are no additional requirements, but the same work heretofore confined to ten grades is now redistributed over eleven grades. This enables pupils to graduate from the High School at seventeen, which is young enough. The work in the first and fifth grades has been reduced, and it is fair to assume there will be fewer failures in the matter of promotion.

At the Jamestown meeting, Acting President Edward Reisler, of the High School Teachers' Association, appointed the following committee to assist in revising the grade work to meet the action of the State Board in adopting an eleven year course: Robert H. Wright, Principal Eastern High School; William P. Stedman, Principal Belair High School, and Edward M. Noble, Superintendent of Caroline County. The present arrangement is somewhat tentative, as there has not been a full meeting of the committee. It will be a year before the committee can outline the work of each grade in detail, but the present arrangement will serve as a guide during the school year, 1907-08.

FIRST YEAR GRADE.

Reading: Sight reading from blackboard; use chart; reading from at least two primers. See Teachers' Manual for suggestions regarding methods in this and other grades. ~

Spelling: Copying words from blackboard and slips; writing words from dictation; spell all words used in primers.

Language: See Language outline for primary grades; which outline is printed as supplementary to this course of study.

Number: Combinations of numbers to twelve. Follow suggestions contained in Number outline given herewith for First and Second Grades.

Penmanship: Follow Teachers' Manual, combining this exercise with spelling and reading.

General Exercises: Daily exercises in vocal music, physical culture, drawing and paper folding. Nature study and conduct lessons should be given under general heading "Language Lessons."

SECOND YEAR GRADE.

Reading: Pupils should read at least two First Readers. Frequent drills in visualizing and sight reading.

Spelling: All words which occur in readers; analysis and synthesis of words; spelling lists of words; oral and written exercises.

Language: See outline on language; science and conduct work may be combined with the language exercises.

Number: Follow outline on Number for Second Year Grade given as supplementary to this course.

Penmanship: Follow suggestions of Teachers' Manual.

General Exercises: Follow suggestions as given for First Grade work.

THIRD YEAR GRADE.

Reading: Pupils must read at least two Second Readers. In addition to the two basal readers, there should be read at least two supplementary reading books which bear on nature, human conduct, biography, etc.

Spelling: Spell from dictation; oral and written reviews; spell all new words of reading books; lessons from spelling book.

Language: See Language outline; combine with these lessons science and conduct topics, also biography and stories.

Arithmetic: Drill in fundamental operations; encourage rapidity and accuracy; follow work as outlined for this grade in the Teachers' Manual.

Penmanship: Follow suggestions of Teachers' Manual.

Geography: Oral lessons; map drawings, and modelling; other suggestions from Teachers' Manual.

Science: Talks on digestion, circulation, respiration, effects of tobacco and alcohol, good ventilation and bathing.

General Exercises: In Teachers' Manual.

FOURTH YEAR GRADE.

Reading: Read at least two basal readers; much supplementary work in line with the regular courses for the grade; select supplementary reading which bears on geography, literature, history, etc.

Spelling: Use spelling book; insist on distinct pronunciation, and have pupils use new words in sentences.

Language: Base work on a good text-book, which should be placed in the pupil's hands.

Arithmetic: Multiplication table; simple problems in fractions and denominate numbers as given in primary arithmetic; mental arithmetic.

Penmanship: Follow suggestions of Teachers' Manual.

History: Stories from Maryland History; biographical sketches.

Geography: Lessons from an Elementary text-book.

Oral Physiology: Lessons on stimulants and narcotics; composition and structure of bones; simple lessons on muscles; foods and drinks.

General Exercises: See Teachers' Manual.

FIFTH YEAR GRADE.

Reading: Pupils should read at least two basal readers; supplementary reading in touch with grade subjects; Hawthorne's "Wonder Book," "The Bell of Atri," by Longfellow, and "Birds of Killingworth," by Longfellow; these to be read to the pupils by the teacher.

Spelling: Continue lessons from spelling book.

Language: Much drill in reproduction and composition; language text-book completed; study various terms of technical grammar.

Arithmetic: Follow Teachers' Manual for Fifth Grade requirements.

Geography: Complete Elementary text-book; elements of agriculture.

Penmanship: Follow suggestions of Teachers' Manual.

History: Primary text-book, emphasizing the men who made the nation.

General Exercises: Follow suggestions of Teachers' Manual as far as conditions will permit. Introduce as much manual training for boys, and domestic science and teaching of household arts to the girls, as time and facilities will allow.

SIXTH YEAR GRADE.

Reading: Lessons from a Fifth Reader; several supplementary books in keeping with subjects of the grade.

Literature: Rip Van Winkle; Longfellow's "Building of the Ship," and "Robert of Sicily;" Hawthorne's "Snow Image," and "Great Stone Face." These can be read by the teacher if preferred.

Spelling: Spelling book completed; lessons from a good text on etymology; insist on proper analysis of words.

English Grammar: Lessons from an elementary text-book; composition work continued.

Arithmetic: Review fractions and denominate numbers; drill in simple interest, discount, profit and loss, stocks and bonds, partial payments, taxes; mental arithmetic.

Geography: One-half of advanced text-book, including elements of agriculture.

Penmanship: Follow suggestions of Teachers' Manual.

History: Lessons from advanced text on U. S. History.

Physiology and Hygiene: Work to be based on an elementary text which treats especially of alcohol and narcotics.

General Exercises: See Teachers' Manual.

SEVENTH YEAR GRADE.

Reading—Literature: Longfellow's "Evangeline"; Irving's "Sketch Book" selections; Bryant's translation "Ulysses Among the Phalacians"; practice reading from Fifth Readers and supplementary books of equal grade.

Spelling: Continue lessons in Etymology, emphasizing word analysis.

English Grammar: Easy lessons from an advanced text-book.

Arithmetic: Previous year's work reviewed; all practical topics of arithmetic completed; elements of algebra taught in connection with arithmetic lessons; mental arithmetic.

Geography: Advanced text-book completed; elements of agriculture.

Penmanship: Follow suggestions of Teachers' Manual.

History: Maryland History and Civil government.

General Exercises: Follow Teachers' Manual as far as practicable.

EIGHTH YEAR GRADE—FIRST YEAR HIGH SCHOOL.

History: Ancient history to 800 A. D.

English: Grammar and composition and the following literary wholes for study and reading: Longfellow's "Courtship of Miles Standish"; selections from Hawthorne, "Rill from the Town Pump," "The Toll Gatherer's Day," "The Gray Champion," "The Ambitious Guest," "The Great Carbuncle"; Poe's "Goldbug"; Scott's "Marmion."

Mathematics: Arithmetic completed and reviewed; algebra to simple equations containing two unknown quantities.

Latin: Latin lessons.

Science: Physiology and Botany.

Manual Training for Boys.

Domestic Science for Girls.

Art: See Teachers' Manual.

NINTH YEAR GRADE—SECOND YEAR HIGH SCHOOL.

History: Mediaeval and Modern European History.

English: Grammar and composition and the following literary wholes for study and reading: Goldsmith's "Deserted Village" and "Traveller"; Scott's "Lady of the Lake" and "Ivanhoe"; Lowell's "Sir Launfal"; Grey's "Elegy," and Shakespeare's "Julius Caesar."

Mathematics: Arithmetic; algebra, through Quadratics; Plane Geometry, Books I and II.

Latin: Caesar—three books.

Science: Physical Geography and Zoology.

Art: See Teachers' Manual.

TENTH YEAR GRADE—THIRD YEAR HIGH SCHOOL.

History: English History.

English: Rhetoric and Composition; brief course in history of American Literature, and the following literary wholes for study and practice; Shakespeare's "Merchant of Venice"; Sir Roger de Coverly's Papers; Macaulay's "Addison"; Coleridge's "Ancient Mariner"; Milton's "L'Allegro and Il Penseroso." For Reading: "House of Seven Gables" and "David Copperfield."

Mathematics: Algebra completed; Geometry (Plane), Books III, IV and V.

Latin: Cicero, four orations, or French or German.

Science: Physics.

Art: See Teachers' Manual.

ELEVENTH YEAR GRADE—FOURTH YEAR HIGH SCHOOL.

History: American History and civil government.

English: Rhetoric and composition; brief course in the history of English literature, and the following literary wholes:

For Study and Practice: Burke's "Speech on Conciliation"; Macaulay's "Life of Johnson"; Shakespeare's "Macbeth"; (optional—"As You Like It"); Milton's "Comus" and "Lycidas."

For Reading: George Eliot's "Silas Marner"; Tennyson's "Idylls of the King."

Mathematics: Solid Geometry; Plane Trigonometry or Arithmetic.

Latin: Virgil's Aeneid—four books, and Latin Prose Composition, or, in place of Latin, either French or German may be taken.

Science: Astronomy or Chemistry.

Art: See Teachers' Manual.

COLLEGE ENTRANCE REQUIREMENTS FOR 1908.

For Study and Practice: Burke's "Speech on Conciliation"; Macaulay's "Life of Johnson," Macaulay's "Life of Addison"; Shakespeare's "Julius Caesar"; Milton's "Shorter Poems."

For Reading and Practice: Coleridge's "Rime of the Ancient Mariner"; George Eliot's "Silas Marner"; Irving's "Life of Goldsmith"; Scott's "Ivanhoe," Scott's "Lady of the Lake"; Shakespeare's "Macbeth," Shakespeare's "Merchant of Venice"; Sir Roger de Coverly's Papers; Tennyson's "Gareth and Lynette," "Lancelot and Elaine" and "The Passing of Arthur"; Lowell's "Vision of Sir Launfal."

Elective Course in Agriculture for County High Schools

YEAR	ENGLISH	MATHEMATICS	HISTORY	AGRI- CULTURAL	SCIENCE	DRAWING AND SHOP WORK	
8 9	} GENERAL COURSE FOR ALL PUPILS						
10	Rhetoric, Composition Literature.	Plane Geom- etry Farm Arithmetic.	U.S. History and Civics.		Agricultural Physics, Botany, Plant Pro- duction.	Mechanical Drawing Farm Car- pentry	Rhetoricals
11	Advanced Grammar, Composition, Literature.	Solid Geom- etry, Book- keeping.		Dairying, Rural En- gineering, Rural Economics.	Agricultural Chemistry Zoölogy Animal Industry	Construc- tion of Plans Farm Carpentry	Rhetoricals

Rural Engineering.

Farm Mechanics

Rural Economics.

Farm Management.

Drawing and Carpentry do not require work outside of Class.

Rhetoricals—One period a week throughout the Course.

EXPLANATION OF AGRICULTURAL COURSE OF STUDY.

PLANT PRODUCTION.

This includes what is taught concerning climate, soil, tillage, drainage, irrigation, fertilizers, farm crops and fruits.

ANIMAL INDUSTRY.

This includes the breeding, feeding, hygiene and management of farm animals.

DAIRYING.

Principles and methods involved in the handling and sale of milk for consumption and in the making of butter and cheese. Feeding, care and management of the dairy cow. Creaming, churning, salting, coloring, washing, packing and marketing.

RURAL ENGINEERING.

Principles and methods involved in the laying out of farms, and the construction and use of farm buildings, systems for water supply, irrigation, sewage, roads and machinery.

RURAL ECONOMY.

Marketing and farm accounts. Preparation for market. Choice of market. Transportation. Method and cost of sale.

Feed and milk records. Crop records. Breeding records. Inventions.

BOTANY.

This subject is taught with special reference to its bearing upon the everyday problems that present themselves to the farmer and gardener. Students get, too, a clear idea of the general principles of plant structure and vegetable physiology.

PHYSICS.

Especial attention is paid to those principles of physics which are most applicable to farm practice: as heating, lighting, ventilation, water supply, friction and lubricants, pumps, eveners, pulleys and engines.

CHEMISTRY.

After an introductory course in certain elements and compounds, the chemistry of foods, soils and fertilizers, and the application of the principles of chemistry to plant and to animal life, form the basis of the course.

DRAWING AND SHOP WORK.

Designing and arraying buildings, machinery, etc. Drawings are made of the shop exercises, and the student works from his own drawings. Designs are made for dwellings, barns, etc. Estimates are made of cost of construction.

FARM ACCOUNTS.

The student is taught to keep the accounts pertaining to the various duties of the farm, that he may know at any time the profit and loss in any department of his business.

FARM ARITHMETIC.

Application of the principles of arithmetic to farm problems.

ELECTIVE COMMERCIAL COURSE FOR COUNTY HIGH SCHOOLS.

EIGHTH AND NINTH YEARS—GENERAL COURSE FOR ALL STUDENTS.

TENTH YEAR

English, 5. Bookkeeping, 5. Typewriting, 5. Stenography, 5. Commercial Arithmetic, 5. Penmanship, 5. Spelling, 5. (Double period for bookkeeping, making seven periods to the day).

ELEVENTH YEAR

English with especial reference to Business Correspondence and Business Forms, 5. Bookkeeping, 5. Stenography, 5. Typewriting, 5. Elements of Commercial Law, 5. Industrial History, 5. Commercial Geography, 5. General History and Civics, 5.

MARYLAND STATE TEACHERS' READING CIRCLE.

TAKEN FROM THE TEACHERS' YEAR BOOK.

George Herbert Palmer, in the April *Atlantic Monthly*, writing of "The Ideal Teacher," says that one of the four characteristics which every ideal teacher must possess is "an already accumulated wealth. These hungry pupils are drawing all their nourishment from us and have we got it to give? They will be poor if we are poor; rich if we are wealthy. We are their source of supply. Every time we cut ourselves off from nutrition we enfeeble them. And how frequently devoted teachers make this mistake! Dedicating themselves so to the immediate needs of those about them that they themselves grow thinner each year. . . . That is exactly the opposite of what it should be. The teacher should be the big, bounteous thing of the community. But the ideal teacher will accumulate wealth not merely for his pupils' sake, but for his own. To be a great teacher one must be a great personality, and without ardent and individual tastes the roots of our being are not fed. For developing personal power it is well, therefore, for each teacher to cultivate interests unconnected with his official work. Let the mathematician turn to the English poets, the teacher of classics to the study of birds and flowers, and each will gain a lightness, a freedom from exhaustion, a mental hospitality, which can only be acquired in some disinterested pursuit."

The above quotation most aptly states the real purpose and aim of our Reading Circle. It is the aim that controls the Board of Managers in its selection of books for the reading course. Books, the reading and study of which will result in professional growth, in mental stimulation, in a "lightness, a freedom from exhaustion and in a mental hospitality," and make the teacher a richer and more bounteous giver, are searched for and adopted.

The teacher who reads and studies the books of our courses, who comes to them really desiring and seeking the thoughts and ideas the author would give her, and who is willing to give and does give real attention to the work of making those thoughts hers, will feel the touch of a living, virile force, and will react to the message of inspiration given.

Never have we planned a more helpful course than the one offered for the year 1907-1908. Every teacher in Maryland is earnestly invited to make use of and enjoy the books of this course.

MEMBERSHIP.

All teachers of Maryland and all persons above the age of eighteen years are eligible to membership. An annual membership fee of twenty-five cents is required in order to meet the necessary expenses of the organization. Its payment entitles the member to a membership card, to all syllabi and information relating to the courses, that may from time to time be sent out by the Secretary, and to a certificate after satisfactory evidence of work done has been presented to the Board of Managers. Membership cards may be obtained from the County Secretary or from Mr. Austin.

COURSES OF STUDY.

There are four courses of study outlined for the year 1907-1908—one major course, Pedagogy, and three minor courses, Literature, History and Science. Every member who wishes to receive the certificate of the Board of Managers for 1907-1908 must take the major course, Pedagogy, and, in addition, one of the minor courses—Literature, History or Science—prescribed for 1907-1908.

PRESCRIBED WORK FOR 1907-1908.

Pedagogy—"Dynamic Factors in Education." M. V. O'Shea. The Macmillan Co. (\$1.25 net).

English—"The Study and Teaching of English." Chubb. The Macmillan Co. (\$1.00 net). "How to Tell Stories to Children." Bryant. Houghton, Mifflin & Co. (\$1.00). "The Teaching of English" has been continued for a second year's study. In addition, Bryant's "How to Tell Stories" is required.

Science—"Nature Study and Life." Hodge, Ginn & Co. (\$1.50). A book that ought to be read by every teacher in Maryland.

History—"The Men Who Made the Nation." Sparks. The Macmillan Co. (\$1.00 net). Also a Reading Circle edition. (50c.)

CERTIFICATES AND TESTIMONIALS.

Certificates, countersigned by the Chairman and Secretary of the Board of Managers, are granted to those members, who, having completed one year's work, present satisfactory evidence of having thoroughly and thoughtfully read the books assigned. This evidence is presented in the form of themes, written in accordance with requirements issued by the Board, and which may be had upon application to the Secretary.

Testimonials, countersigned by the Secretary of the State Board of Education and the Secretary of the Board of Managers, are awarded by the State Board of Education to all members who have satisfactorily completed three years of Reading Circle work, and who are recommended for this honor by the Board of Managers.

ASSISTANCE.

The Board of Managers desires to be as helpful as possible to the teachers of the State. Members of the Reading Circle desiring information or advice at any time on any of the subjects of study are invited to direct their communications to any member of the subcommittee of the Board of Managers named below and appointed to have special charge over that subject of study, or to the Secretary, enclosing return postage for the reply.

ORGANIZATION OF THE BOARD OF MANAGERS.

Chairman—Hon. M. Bates Stephens, State Superintendent of Public Education, Annapolis, Md.

Secretary—Mr. Herbert E. Austin, State Normal School, Baltimore, Md.

Sub-Committees—Pedagogy: Miss Sarah E. Richmond, State Normal School, Baltimore, Md.; Dr. Robert H. Gault, Washington College, Chestertown, Md. English: Miss Mary E. Ford, State Normal School, Frostburg, Md. Science: Mr. Herbert E. Austin, State Normal School Baltimore, Md. History: Mr. J. Mont. Gambrill, editor *Atlantic Educational Journal*, Baltimore, Md.

PURCHASE OF BOOKS.

The required books may be obtained at the office of the County Superintendent, at the book stores in Baltimore or from the publishers.

Wherever possible, members are advised to purchase their books through the Superintendent of their county, as books so purchased can frequently be obtained at lower prices than those quoted above.

THE PRESCRIBED WORK SINCE REORGANIZATION IN 1901.

1901-1902.

Hindale's "Art of Study."
 Barrett Wendell's "English Composition."
 Shakespeare's "Julius Caesar" and "As You Like It."
 Scott's "Nature Study and the Child."

1902-1903.

White's "The Art of Teaching."
 Matthews' "Introduction to American Literature."
 Lowell's "Vision of Sir Launfal" and "Commemorative Ode."
 Hodge's "Nature Study and Life."

1903-1904.

Shaw's "School Hygiene."
 Bliss Perry's "A Study of Prose Fiction."
 Scott's "Ivanhoe."
 Andrews' "Botany All the Year Round."

1904-1905.

MacMurray's "The Method of the Recitation."
 Bliss Perry's "The Study of Prose Fiction."
 George Eliot's "Silas Marner."
 Andrews' "Botany All the Year Round."

1905-1906.

James' "Talks to Teachers."
 Thackeray's "Henry Esmond" and "Vanity Fair."
 Fiske's "Critical Period in American History."
 Ball's "Starland."

1906-1907.

Seeley's "History of Education."

Chubb's "The Study and Teaching of English."

Hart's "Source Book of American History."

Hielprin's "The Earth and Its Story."

Any further information regarding the Reading Circle may be obtained from Herbert E. Austin, Secretary Board of Managers, State Normal School, Baltimore, Md.

COUNTY TEACHERS' INSTITUTES

1907-08

County.	Date.	Visiting Superintendents.

	2	Joint Institute Maryland State Normal School
	3	Joint Institute at Hagerstown.
	4	Joint Institute at Ocean City.

NOTE—It was found necessary to cancel the date for the Hagerstown joint institute and to abandon the idea of having Washington and Carroll counties meet jointly. An institute for each county will be held later in the school year.

COUNTY SUPERINTENDENTS' SUPPLEMENTARY REPORTS.

CECIL COUNTY.

ELKTON, MD., August 8, 1907.

Hon. M. Bates Stephens, State Superintendent of Education.

MY DEAR SIR—Herewith find my report for the year 1906-7. It has been a fairly prosperous one to us.

We have completed the North East High School building, begun last year; it is a very substantial two-story brick, 64 feet by 66 feet, at a total cost of \$13,520.07 to the School Board. In addition to this I. S. Ford and sister donated the lot, and the teachers and pupils placed a handsome metal ceiling and a stained glass window in the assembly room and electric lights throughout the building.

We have erected a handsome two-roomed house at Elk Mills, 28.6 feet by 52 feet, with a large vestibule in front, at a cost of \$2,475.56. And a house at West Amwell of brick up to the windows and frame above, 28 feet by 32 feet, with vestibule in front, at a cost of \$1,484.56.

In October, we opened in a building leased at a nominal rent from the "Friends," an Agricultural High School at Calvert. In which, in addition to the prescribed High School course, is taught agriculture.

The children can easily detect any of the sixty odd foul seeds that farmers so frequently find in the seeds of timothy, alfalfa and the clover that they purchase. They have also had practical lessons in spraying with insecticides and fungicides. It meets the hearty approbation of the farmers.

We hope soon to have there a suitable house of our own, as a generous friend, Joseph S. Poque, has promised a two acre lot, and the County Commissioners have levied for a building.

Our effort towards consolidation, so far, has not met with success, meeting with opposition from those who would be most benefited, the patrons.

I am, most respectfully yours,

GEORGE BIDDLE.

HARFORD COUNTY.

Dr. M. Bates Stephens, Secretary State Board of Education.

MY DEAR SIR—In transmitting to you the report of School Commissioners of Harford County for the scholastic year ending June 30, 1907, and the fiscal year closing July 31, 1907, I desire to say that general conditions in our schools for the year 1906-07 have been reasonably satisfactory and more than ordinarily encouraging. In my official visits, reaching nearly 200, I have found the majority of our teachers doing professional work above the average, and with a few exceptions, exhibiting an earnest, active and progressive spirit.

Recognizing, as I do more clearly as the years go by, and the circumstances and conditions affecting our people are better understood, that the most serious problems of school administration are those that touch the work and interests of the first six grades, I have aimed to give special attention and supervision to this part of our system. The instruction received by the great mass of our children even in the first five grades is all they will ever get, hence our sacred responsibility for these years. I am inclined to think that my emphatic efforts to improve this phase of our educational work is bearing some fruit in the shape of better primary and intermediate methods, and in a clearer recognition of the just claims of these early years to our most earnest sympathy and consideration. While special stress has been laid upon the elementary instruction, it has not been our policy to neglect those in classes more advanced; the aim being to provide those pupils who will in all probability leave school before reaching higher grades, with at least a training sufficient for the ordinary demands of life, and to prepare those who will remain for advanced courses, for intelligent and effective work. We believe there exists in High Schools, to some extent at least, a tendency on the part of Principals to neglect the work below them, and to bend their energies exclusively to the raising of the High School curriculum to meet imaginary college requirements or to exceed the work of other similar schools. We are in hearty sympathy with this ambition to excel, but it should be an ambition to lead in quality rather than quantity, and above all, it should not result in any lack of intelligent supervision of the primary and intermediate work below. Every High School Principal should know how to judge the character of work done by his assistants, and in a *specific* sense, instead of a *general* way. To do this he must

study the work both in a theoretic and practical way, and regard it his duty to visit his co-workers whenever opportunity offers, for observation, for suggestion, for encouragement,—and to know that the foundations being laid beneath him and his special department are solid and substantial.

The tendency seems to be a little too strong toward the mere information side of instruction, and this inclination is emphasized by the home pressure for the so-called practical and utilitarian. It seems to us that the true education is that which develops power to *acquire*, both while at school and beyond it; that which develops *students* rather than passive victims of fact presentation; that which sends our young people out of school with a clearly defined conviction of duty and responsibility, with correct views of life and its requirements, and with a thoroughly developed love for study, refinement and intellectual mastery. Too many of our teachers are wearing themselves out doing things that should be done by their pupils, but under the teacher's constant oversight, direction, guidance. Teachers and pupils must be co-workers if the best is to be accomplished.

Teachers too frequently develop into "preachers," throwing out constant streams of prepared information at long range,—this is not teaching; the schoolroom should be a work-shop, a laboratory where each one is shaping, modeling, investigating,—working out his own problems, searching out truth for himself, generating power by exercise and personal effort, always under the watchful eye and the skillful suggestion of a trained and patient teacher.

Very respectfully submitted,

CHAS. T. WRIGHT,

Secretary.

HOWARD COUNTY.

Dr. M. B. Stephens,

Secretary State Board of Education, Annapolis, Md.

DEAR DR. STEPHENS—I have the honor, herewith, to submit my annual report of the schools of Howard County for the scholastic year ending July 31, 1907.

It is with pleasure that I report the schools of Howard County to be in a flourishing condition.

Within the past year we have built an addition of three rooms to our Ellicott City High School, extended the school course to comply with the curriculum, and have at last succeeded in having the school placed on the accredited list of High Schools.

Our Manual Training School at Ellicott City has made a good showing for the year, and we are now about to extend Manual Training to the Savage Graded School, having just completed a new room in connection with the said school for Manual Training.

I am now urging the importance of a Colored Industrial School for the county, but as yet my plans have not materialized in view of the great opposition to the education of the negro in this county.

With best wishes for your continuous effort in behalf of Public Education, I am,

Very sincerely yours,

W. C. PHILLIPS,

Superintendent.

KENT COUNTY.

Dr. M. Bates Stephens, Secretary, Annapolis, Md.

I herewith submit my annual report for the year ending July 31, 1907. It will be seen that the enrollment and average attendance have not been so great as in the preceding year. This was caused by the prevalence of an epidemic believed to be small-pox. Nine of the schools were closed for a time and a great number of pupils in this section who usually enter on the second day of January did not enter school at all, for fear of contagion in the school.

We have built four new schoolhouses: one at Edesville, containing two rooms and costing \$1,349.19; one at Worton, having two rooms, costing \$1,325.08; one at Janvier, costing \$733.86; one at Melitota, for colored children, costing \$580.00.

We believe that the school property is in better condition than it has been before for many years.

Very respectfully,

MILTON MELVIN,

County School Superintendent.

MONTGOMERY COUNTY.

ROCKVILLE, MD., September 1, 1907.

*Dr. M. Bates Stephens,**State Superintendent of Education, Annapolis, Md.*

DEAR SIR—With the approval of the State Board of Education, the Sherwood Academy at Sandy Spring has been conducted as a High School this year with very gratifying results. The Andrew Small Academy buildings and grounds, with an endowment of \$500 per year, have been placed at the disposal of the Board of School Commissioners for this county and converted into a High School.

A new schedule of salaries has been adopted with a view to according credit for experience and better rewarding an increase in attendance and exciting ambition for improvement in teachers' certificates.

The monthly teachers' associations, inaugurated this year, have proven beneficial. A uniform course of study was adopted and questions for written examinations for all scholars except those in the first and second grades were issued from this office. The results have been helpful.

The organization of the district school trustees of the county into a county association was fostered by this Board; and the interest manifested by the trustees is most encouraging.

With great respect, I am

Very truly yours,

EARLE B. WOOD,

County Superintendent.

SOMERSET COUNTY.

THOMAS H. BOCK, *President.*

W. H. DASHIELL, *Sec'y-Treas. and County Superintendent.*

Dr. M. Bates Stephens,
Secretary State Board of Education, Annapolis, Md.

PRINCESS ANNE, MD., August 21, 1907.

DEAR SIR—The Report of the Public Schools of Somerset County, for the year ending July 31, 1907, is herewith submitted.

The enrollment and average attendance of pupils are both smaller than last year, due to the prevalence of diphtheria in certain sections of the county; some of the schools having been closed six or seven weeks to prevent the spread of the disease.

It is with regret that we have to report that owing to lack of funds our school year had to be shortened by one month. Teachers, however, who made the legal average of 15 were paid *pro rata* upon the \$300 basis, the law being thus complied with as nearly as possible. To extinguish a former debt and to keep the schools open to April 26th, the County Commissioners made a special appropriation, as will be seen by our financial report. The deficit shown in this report is practically covered by uncollected assets. Next year we hope to continue our schools for the full term of nine months.

The Tri-County Institute, embracing Wicomico, Worcester and Somerset counties, was held at Ocean City, August 27 to September 7, and was eminently successful and profitable.

Washington's Birthday, Maryland Day and Arbor Day, were each celebrated with suitable exercises.

Yours very truly,

W. H. DASHIELL,

Secretary.

FINANCIAL REPORTS.

REPORT OF M. BATES STEPHENS, TREASURER STATE BOARD OF EDUCATION, FOR FISCAL YEAR ENDING JULY 31, 1907.

EXPENSE FUND OF THE STATE BOARD OF EDUCATION.

RECEIPTS.

WORCESTER COUNTY.

DR. M. BATES STEPHENS,

Secretary State Board of Education, Annapolis, Md.

DEAR SIR:—I herewith submit the Annual Report of the Public Schools of Worcester County for the fiscal year ending July 31, 1907.

Very respectfully,

E. W. McMASTER, *County Superintendent.*

SUMMARY OF SCHOOL STATISTICS

FOR THE YEAR ENDING JULY 31, 1907.

	1907.	1906.
Number of schoolhouses owned by the county, 82; rented, 4; total.....	86	86
Frame, 86.		
Number of rooms occupied when attendance is largest.....	133
